- Identify and Developed the Test Scenarios.
- Prepared and executed all functional test cases.
- Angular JS and React using Graph Design on UI Pages.
- UI Page on data fetching and set using Angular tags.
- Analysis of Client Requirements on Website.
- M.S SQL D.B Used.
- XML based Mapping file developing using SOAP Web Service.
- Easily Data Store, Update and fetch record in Database.
- Participated in Bug review meetings. Involved in (Daily/weekly) review and status Meetings with the team.
- Analyzed the requirements.

(2) Project Title : Salesforce Source Tracking

Duration : February 2018 -2019

Client : RightWave, Anapaln, Clearslide, Cast light, Moment feed, Slash Next

Testing Approach : Manual and Automation (JMeter)

Role : Developer

Front-end : JavaScript, JQuery, JSON

Back end : MYSQL, M.S. SQL, Salesforce, Marketo, Oracle D.B.

Team Size : 2

RESPONSEBILITY : My responisibility is developing the business logic part in JavaScript and JSON.

- Requirements gathering from end users for the implementation of Source Tracking Process.
- Understanding the functional Requirements Specifications.
- Identify and Developed the Test Scenarios.
- Prepared and executed all functional test cases.
- Analysis of Client Requirements on Website.
- Marketo, Salesforce, Oracle D.B Used.
- Developing Business logic in application by using JavaScript and JSON.
- Easily Source Tracking by using Session Cookie and Persistent Cookie.
- Easily Source Tracking Data Store and Update record in Database.
- Participated in Bug review meetings. Involved in (Daily/weekly) review and status Meetings with the team.

(3) Project Title : SAP Business S/4HANA Suite ROI Calculator

Duration : Aug 2018 - Feb 2019

Client : Rimini Street U.S

Testing Approach : Manual & Automation

Role : Developer and Designer

Project IP : <https://riministreet-devdss.ingeniuxondemand.com/s4-hana-calculator>

Front-end : JavaScript, JQuery, JSON, CSS3, AJAX and HTML5

Back end : Marketo D.B.

Team Size : 4

RESPONSEBILITY : My responsibility is Both Calculation Part, Validation and Designing Part Handling.

- Requirements gathering from end users for the implementation of SAP Business module.
- Understanding the functional Requirements Specifications.
- Identify and Developed the Test Scenarios.
- Prepared and executed all functional test cases.
- Programmer and Designer.
- Marketo D.B Used.
- Developing Responsive Web Pages Design.
- Developing Business logic in application by using JavaScript and JQuery.
- Easily Data store and fetch by using marketo D.B
- Selection Easy to Manage the Database and Web Pages.
- Participated in Bug review meetings. Involved in (Daily/weekly) review and status Meetings with the team.

(4) Project Title : RW Data Uploader

Duration : December 2017 - April 2018

Client : Anapal, U.S

Testing Approach: Manual and Automation.

Role : Developer and Designer

Front-end : Core Java, Java Script, JQuery, Ajax, Angular JS, JSON and JSP

Back end : Spring MVC, Hibernate, JPA, Spring Security, J2EE, MYSQL, M.S. SQL, Oracle D.B.

Team Size : 5

RESPONSEBILITY : My responsibility is Both Client to Server Side Handling.

- Requirements gathering from end users for the implementation of datauploader module.
- Programmer and Designer.
- Understanding the functional Requirements Specifications.
- Identify and Developed the Test Scenarios.
- Prepared and executed all functional test cases.
- Analyzing test cases, preparing estimations-feasibility analysis.
- Participated in Bug review meetings. Involved in (Daily/weekly) review and status Meetings with the team.
- Date base connection easy by using Hibernate with spring framework.
- Developing SQL, HQL, HCQL queries in Database.
- Developing Business logic in application by using Collection framework and Threading
- Easily Data store and fetch by using spring core and AOP implementations.
- Data easily manage by using the Session and CSV File.
- Selection Easy to Manage the Database
- Analyzed the requirements.

(5) Project Title : PLACEMENT BIZ TRACKER

Duration : May 2016- Till Now

Project IP : <http://www.placementbiztracker.com/>

Front-end : Core Java, Advance java J2EE, spring,

HibernateClient Side : Html, CSS, Java Script, JQuery and Ajax

Role : Programer and Designer

Back end : My SQL, Core Java, J2EE

Back-end Tools : Joins Query, Procedure, Functions, Aggregate Functions, Transaction Management.

Team Size : 5+

RESPONSEBILITY : My responisibility is Both Client to Server Side Handling.

ROLE DESCRIPTION

- Requirements gathering from end users for the implementation of Placement module.
- Programmer and Designer.
- Date base connection easy by using Association concept and property file.
- Developing SQL, HQL, HCQL queries in Database.
- Developing Business logic in application by using Collection framework and Threading.
- Easily Data store and fetch by using spring core and AOP implementations.
- Data easily manage by using the Session.
- Developing user training manuals and documents.
- Selection Easy to Manage the Database.

(6) Project Title : ONLINE SHOPPING SITE

Duration : March 2015 - September 2015

Front-end : Core Java and Advance java J2EE Technology

Client Side : Html, CSS, Java Script.

Back end : Core Java, J2EE, Oracle10 g

Team Size : 2+

RESPONSEBILITY : My responisibility is Both Client to Server Side

Handling.ROLE DESCRIPTION

- Requirements gathering from end users for the implementation of shopping module.
- Programmer and Designer
- Developing SQL query, Joins query, Procedure, Function and Some Aggregate function.
- Easily Data base Connectivity by using Association concept and Properties file.
- Selection Easy to Manage the Database
- Selection Easy to Maintain Project
- Selection Easy to Manage the Database
