DETAILS OF PROJECTS:

Project 1# : Platform migration, Database upgrade from 12c to 19c and EBS Upgrade from 12.1.3 to R12.2.11 and OCI Migration

Client : CareFirst
Environment : 19c, R12.2.X
Database :19C
Operating System : Linux 7
Role : Oracle APPS DBA

Responsibilities:

- The project involved Platform migration AIX to Linux, upgrade of their Database 12c to 19c & EBS upgrade 12.1.3 to 12.2.11.
- The upgrade roadmap consisted of DEV, SIT, UAT, DRYRUN and Production upgrade.
- My role comprises of analysis of source instance, documentation and upgrades it to latest release version and support from offshore.

Project 2# : Upgradation from OBIA 12C and support EBS R12.2

Client : Nov.
Environment : OBIEE, ODI, R12.2.X
Database :19C
Operating System : Linux 7
Role : OBIEE Admin and APPS DBA

Responsibilities:

- The project involved upgrade of their OBIA12c: BIApps 11.1.1.10.3 from 11.1.1.7.1 to 11.1.1.10.3 & Installed Database 19c on Linux 7.
- Installing and Configuring Oracle Business Intelligence 12c (12.2.1.4.0) and upgrade 11g to 12c.
- OHS installation and configuration and Update BI/ODI URLs in OHS Config.
- BI Admin Tool and ODI studio installed in window server.
- The upgrade roadmap consisted of FLEX, DEV, UAT and Production upgrade
- My role comprises of analysis of source instance, documentation and upgrades it to latest release version and support from offshore.
- Support EBS R12.2.X

Project 3# : Support Database 19c, EBS 12.1.3 and OAM/OID

Client : Seadrill
Environment : EBS 12.1.3, OAM/OID 12.2.1.4, Apex 19.1
Database :19C
Operating System : Linux 7
Role : Lead

Responsibilities:

- The project involved supporting Database 19c, EBS 12.1.3 with is integrated with OAM.
- Month end Refresh activity from PROD to PATCH

- Refresh activity from PROD to UAT and PROD to DEV in every 3month.
- Patching Activity.

Project 4# : Upgradation from 11i to R12

Client : Bank of Uganda.
Environment : Oracle Applications 11i
Database : 10g to 11g
Operating System : SUN Solaris 5.10.
Role : Oracle Applications DBA

Responsibilities:

- The project involved upgrade of their Oracle Applications from 11.5.10.2 to 12.1.3 & Database upgrade from 10.2.0.3 to 11.2.0.3) on SUN Sparc 5.10.
- The Discoverer was upgraded from 4i to 11g.
- JRE Upgrade.
- DMZ setup.
- The modules upgraded were Financials, SCM, and HR & Payroll.
- The upgrade roadmap consisted of Trail1 from offshore and Trail2, UAT and Production upgrade onsite.
- My role comprises of analysis of source instance, documentation and upgrades it to latest release version and support from offshore.

Project 5# : Implementation & Upgradation from 11i to R12

Client : ICC (Ipswich City Council).
Environment : Oracle Applications 11i
Operating System : OEL 6.4.
Role : Oracle Applications DBA

Responsibilities:

- The project involved upgrade of their Oracle Applications from 11.5.10.2 to 12.1.3, on OEL6.
- The Discoverer was upgraded from 4i to 11g, JRE Upgrade
- Backups Cold using RMAN.
- The modules upgraded were Financials, HRMS & Payroll.
- The upgrade roadmap consisted of 2 trials and UAT from offshore and PRODUCTION from on-site.
- My role comprises of analysis of source instance, documentation and upgrade it to latest release version.

Project 6# : Implementation & Upgradation from 11i to R12

Client : NEXTEL(BRAZIL)
Environment : Oracle Applications 11i
Database : Exadata
Operating System : OEL 6.
Role : Oracle Applications DBA

Responsibilities:

- Applications Upgrade from R11.5.10.2 to R12.1.3. OATM Migration, NLS patching for the following languages – Latin American Spanish (ESA), Brazilian Portuguese (PTB).
- Trial-1, Trial-2, UAT, Dry-Run from offshore and Production Upgrade from onsite.
- Applied latest consolidated update patch and product family packs, Post-upgrade Support,.
- My role comprises of analysis of source instance, documentation and upgrade it to latest release version

Project 7# : Implementation & Upgradation from 11i to R12
Client : Mellanox
Environment : Oracle Application 11i
Database :11g
Operating System : Red-Hat Enterprise Linux.
Role : Oracle Application DBA

Responsibilities:

- The Discoverer was upgraded from 4i to 11g, JRE Upgrade .
- The upgrade roadmap consisted of 2 trials and UAT and PRODUCTION from offshore.

Project 8# : Implementation & Upgradation from 11i to R12
Client : DSPG
Environment : Oracle Application 11i
Database :11g
Operating System : Red-Hat Enterprise Linux.
Role : Oracle Application DBA

Responsibilities:

- The Discoverer was upgraded from 4i to 11g, JRE Upgrade .
- Database upgrade (EBS,Demantra,BI) from 10g to 11g.
- EBS upgrade 11i to R12.
- Applied latest consolidated update patch and product family packs, Post-upgrade Support,
- The upgrade roadmap consisted of 2 trials and UAT and dryrun, PRODUCTION from offshore.

Project 9#: Implementation & Upgradation from 11i to R12
Client : Radware
Environment : Oracle Application 11i
Database :11g
Operating System : Red-Hat Enterprise Linux.
Role : Oracle Application DBA

Responsibilities:

- Database upgrade from 10g to 11g.
- EBS upgrades 11i to R12.2.
- Applied Israel Localization patch, Customization, NLS patch.
- Add node with share appltop.
- Load-Balancer setup & SSL configuration.
- The upgrade roadmap consisted of 2 trials and UAT and dryrun, PRODUCTION from

offshore.

Project 10# : Implementation & Upgradation from 11i to R12
Client : FORTUM
Environment : Oracle Application 11i
Database :12c
Operating System : Red-Hat Enterprise Linux.
Role : Oracle Application DBA

Responsibilities:

- Database upgrade from 11g to 12c.
- EBS upgrades 11i to R12.2.
- Applied Poland, Customization, NLS patch.
- Add node with share appltop.
- Load-Balancer setup & SSL configuration.
- The upgrade roadmap consisted of 2 trials and UAT and dryrun, PRODUCTION from offshore.

Project 11# : Implementation & Upgradation from 11i to R12
Client : VSSH
Environment : Oracle Application 11i
Database :12c
Operating System : Red-Hat Enterprise Linux.
Role : Oracle Application DBA

Responsibilities:

- Database upgrade from 10g to 11g.
- EBS upgrades 12.0.6 to R12.1.
- Applied Poland, Customization, NLS patch.
- Add node with share appltop.
- Load-Balancer setup & SSL configuration
- The upgrade roadmap consisted of 2 trials and UAT and dryrun, PRODUCTION from offshore.

Project 12# : Implementation & Support (11g database & 12.1.3)
Client : Dutel
Environment : Oracle Application R12.1.3
Database :11g
Operating System : Solaris
Role : Oracle Application DBA

Responsibilities:

- Performed cloning.
- Added secondary node & I-supplier node
- SSL Configuration
- DMZ Setup.
- Load Balancer/Reverse Proxy setup and configuration (Internal and External)
- Configure EAM Mobile apps with DMZ.

- The upgrade roadmap consisted of 2 trials and UAT and dryrun, PRODUCTION from offshore.

Project 13#: Production Support (Database and EBS)

Responsibilities:

- Daily Preparing HC Report.
- DB related issue like RMAN Backup, DG Sync
- Monitoring DB alert.
- Monitoring and performing activity for OEM alerts.

Qualification Highlights:

B. TECH – Bachelors in Computer Sc & Engineering from **B.P.U.T.**
