Description:

Credit Suisse is a leading global financial services company, offering clients financial advice in all aspects of investment banking, private banking and asset management. Founded in 1856, Credit Suisse today has a global reach with operations in about 50 countries.

Fenergo Client Lifecycle Management is an end-to-end platform that enables banks to transform how they manage clients - from initial onboarding, to KYC/AML compliance, to client data management & KYC reviews. As part of implementing the Fenergo product in Credit Suisse, the data migration team would migrate the data from CCR database to the Fenergo database. CCR database is considered as master data for the data migration which stores data from the legacy client onboarding applications - CMS, ICON Account, ICON Party and ICATS.
