I wish to work in a team of motivated individuals who wish to work towards the advancement of the company and its goals. Interested in the role of a Software Engineer where I can contribute my analytical skills and knowledge acquired during work experience and pursuing my degree in Computer Science and Engineering.

WORK EXPERIENCE

Global Logic - A Hitachi Group Company - Software Engineer

December 2020 - current

Nagpur (Maharashtra)

- Proactive member of performance tuning team from one year; an iterative approach to making and then monitoring modifications to an application and its database. API's monitoring and optimization, CPU performance optimization, DB monitoring and query optimization and well as efficient code enhancements.
- AWS certified CLOUD PRACTITIONER achieved in February'2022.
- Working on building and maintaining Java micro-services under the current assigned project which uses Spring boot, Postgres and ElasticSearch as DB, Apache Kafka, Debezium setup, Docker and many other platforms in a team of 140 professionals to write scalable code for the Hitachi platform that increases the reliability and performance of customer's energy assets.
- Focused on Back-end development, gaining more depth knowledge on Java Backend. Gained knowledge on API development, completing a certificate for Secure WEB API development.
- Assigned to different responsibility roles Developer, secondary Dev-secops, in two of the major projects of company during this position. Communicated with On-shore team in both the projects, for the smooth and streamlined flow of the work in the project.
- Worked closely with internal Devops team as developer for the migration of java micro-services to AWS. Drafted documentation for 100% migration of micro-services to AWS, helping peers in completion of process.
- Trained as a Full-stack developer in the training journey of company, under Stackroute- an NIIT incubated venture, NIIT is a leading global learning outsourcing company. Passed Training with 83%.

PROJECTS
