Selected Relevant Experience

Project: Accenture Internal:

Technologies: Salesforce Consumer Goods Cloud

Summary: Development of offline mobile app in react native with Salesforce Consumer Goods Cloud functionalities in backend

Consumer Goods Cloud is built on the core Salesforce platform, giving brands the power to transform how they collaborate with retail channel partners, it gives account managers a 360-degree view of sales targets, orders, promotions, and other key account insights from a single platform and also helps on-the-ground field reps optimize store visits, tasks, scheduling, and routes for Retail Execution.

Project: POLS Salesforce Implementation & AO Maintenance:

Technologies: Flows, Configurations, Triggers, Apex controller, Sharing Rules, Workflows, Omni Channel, process builders, Email alerts, Custom Validation, Layouts and service requests.

Summary: Designed and developed various modules for POLS implementation. Transitioned Project from Legacy system to Salesforce. The use case was to implement a system for PolS on management of students as leads and universities as accounts. Customized Lead conversion process to work as per the HEDA model for higher education by leveraging more of the OOTB functionalities in salesforce. A spoon of batches, custom settings, schedulers, triggers, workflows, lightning components and Reports were used to design the solution.

Maintenance and support along with enhancement for the POLS implementation project, provided L2 support closely working with clients on resolving tickets at the earliest and working on long time solution for frequent issues.

Experience and Key Responsibilities:

- Working closely with clients on designing the solutions as per need for project requirements
- Managed and been the point of contact for CG Mobile App SFDC Part.
- Worked Partially on custom Lightning components to support the lightning experience to stakeholders.
- Worked on different modules of development as per the received user stories.
- Worked on creating POLS system in salesforce from scratch.
- Designed and built the needed process automation using process builder and Flows.
- Responsible for managing and maintaining components tracker for all the stories and deployment till UAT.
