    - Designing and developing modules of the application
    - Adhering best practices for project and documentation

Project: - 1   PSA - Capgemini

Project Description: -
The project includes building an UI interface to maintain center data hub application of all the PSA dealers and their rules. Rest service to provide data to all the other dependent application.

Contribution:
- Requirement gathering Interaction with client.
- Preparing Design documents.
- Developing the Code as per the requirements.
- J-Unit testing and integration testing of owning use cases
- Analysis and Design review.
- **Used Swagger for API Documentation.**
- **Handled 8+ person team.**
- **SAML 2 Authentication integration in Spring Boot Application**
- **Docker Image Creation and Deployment.**
- Team Handling with their technical issues. Currently handling team of size 8

Technologies: - Java, Struts, JSP, HTML, JavaScript, JQuery, Angular, Rest, Soap, Seed Stack, Spring Boot.

Project: - 2   M'Collect

Project Description: -
Collecting the data of enterprise into M'Collect database and managing these Data from Admin console.

Contribution:
- Requirement gathering and analysis,
- Server Setup- JNDI, BIRT, Mail, SMS, GCM Notification, Project Monitoring.
- Software Design (HLD and LLD) along with DB schema, UI Screen, DAR.
- Coding, testing and deployment.
- Deployment on Amazon Cloud.

Technologies: - Java/J2EE, Android, Spring MVC, Hibernate, JavaScript, CSS, Ajax, Multi-threading, Collection, Angular 2 and Node JS

Project: - 3 Old-Age-Home

Project Description: -
The Old Age Home is for managing the Hospital Management.

Contribution:
- Requirement gathering and analysis,
- Server Setup- JNDI, BIRT, Mail, SMS, GCM Notification, Project Monitoring.
- Software Design (HLD and LLD) along with DB schema, UI Screen, DAR.
- Coding, testing and deployment.
- Deployment on Amazon Cloud.

Technologies: - Java/J2EE, Android, Spring MVC, Hibernate, *JavaScript, CSS, Ajax, Multi*-threading, *Collection, Angular 2 and Node JS*

Project: - 4 RSA

Project Description: -
RSA Stands for Road Side Assistance. RSA is the system that will help the people on road. The user will ask the any kind of help like near-by Hospital, restaurants between sources to Destination and admin people will update that person. RSA have three modules, which are connecting to the Server. Survey Module is putting the data into server admin module is verifying the data and User module can use this data to show options to user in distress.

Contributions: -
- Requirement gathering and analysis,
- Server Setup- JNDI, BIRT, Mail, SMS, GCM Notification, Project Monitoring.
- Software Design (HLD and LLD) along with DB schema, UI Screen, DAR.
- Coding, testing and deployment.
- Deployment on Amazon Cloud.

Technologies: - Java/J2EE, Android, Spring MVC, Hibernate, JavaScript, CSS, Ajax, Multi-threading, Collection

Project: - 5 SAP-Hybris Theme Customization

Project Description: -
E-shopper ecommerce website brings multiple products, opportunities and services to millions of customers. Enable businesses to establish their online presence, there created contact-US page integration.

Contributions: -
- Created the contact-US page,
- Customize the CMS component.
- Added new themes and BTG.
- Added the Promotion to product.

Technologies: - SAP-Hybris, Eclipse, Java/J2EE, Spring MVC, *JavaScript, CSS, Ajax*

Project: - 6 Hometown, ALL

Project Description: -
Future Group, as one of India's retail pioneers with multiple retail formats and brings multiple products, opportunities and services to millions of customers in India. Enable businesses to establish their online presence, so that their client customers will be able to place orders from their Mobiles (Android Application).
