## PROJECTS

### **WhizLeague (<https://www.whizleague.com>) — Bentchair**

Its online video based learning platform helps to learn different skills.

Developed the new frontend project based on react. Implement functionality to add to the course in cart then they buy the course in the checkout process and integrated payment gateway.

Implemented the API in Node js add features like mail , used firebase and implemented in react.

### **Firetext — Noto It Solutions**

In this project we used third party sdk twilio for sending text and whatsapp messages to customers. Here customers also can live chat from the website. Customers can book a slot in the parking lot. Here we also use facebook and google sdk to send ads.

We did meetings with clients to give progress to clients about projects and development.

### **Shahbanu Rugs (<https://shahbanurugs.com/>) — Noto It**

Developed the ecommerce frontend and backend part . On frontend users can search the product , they can add the product in the wishlist or add to cart. After adding to cart users can checkout and buy the product.In
