## **PROJECTS**

### **Pelotonia—**

Pelotonia is a community that is determined to see an end to cancer. It helps cancer patient by donating fund which is given by the rider, Participant, and challenger. It includes recurring donations as well as an online payment gateway. We introduce the NonProfit service pack.

**Utilized Technologies-** NPSP Service Pack, Triggered Flows, Apex Triggers, Async Jobs, callouts, Payment gateway (Braintree).

## **SFDC PRODUCTS**

NPSP

Field Service Lightning

Sales Cloud

Service Cloud

Community Cloud

## **SFDC INTEGRATION**

Hubspot

Salesforce Inbox

Pulsar

## **Flexco—**

Flexco has been partnering with customers just like you to help make sure your belt conveyors run efficiently. It works as B2B and B2C solution. Lots of integration we used in the project for increasing the sales through B2B solution.

**Utilized Technologies-** Sales and Service Data Models, Triggered Flows, Integration with the HubSpot and Salesforce Inbox.

## **CCT(Chicago Community Trust)—**

It is a trust organization where donations and grants are given by the user and there is also a facility for the recurring grant. Agents of the trust call the customer at the time of recurring and increasing the sales. We used a community cloud which is helpful for providing B2B solutions.

**Utilized Technologies-** Community Cloud, Lightning Web Component, Visual force pages, Apex class and Triggers.

## **Abbott—**

This application is for the Abbott diagnostic machines repairing and the service purpose in which we are using the pulsar app because the FSR use this app for service purpose. We are using the field service lightning data model to build this Application.

**Utilized Technologies-** Salesforce Field Service Lightning, Apex class, Triggers, Salesforce Automatization, Integration of the Pulsar App.
