Projects:

Project 1:

Title: **Unycare**

Duration**:** May 2018 - present

Description: Unycare is a patient and doctor engagement portal. Where the user can register

directly to the system as a doctor or a patient. The patient can schedule an appointment in the available time by selecting and searching the doctor with or without registration. At the time of the schedule the patient and the doctor can connect through the video call. While in the call the doctor can view the reports uploaded by the patient and can annotate. The patient can also invite a doctor to the system.

Project 2:

Title: **illumy**

Duration: September 2016 - May 2018

Description: Illumy is creating a modern Persistent Communications experience that combines text, voice, video, and productivity to connect friends and colleagues like never before. With pure cloud delivery that is always synced across all platforms, be prepared to energize how you connect, communicate, and interact.

Project 3:

Title: **Eyedrive**

Duration: July 2015 to September 2016

Description: Eyedrive is an evolution in the car sales process. The only application of its kind. It connects buyers and sellers in a real-time portal, allowing for a 1 to 1 preview of an automobile.

Project 4:

Title: **TATA TRUSTS-TSM(PRISM)**.

Duration: July 2014 to July 2015

Description: TIMESHEET MANAGEMENT(TSM) is a work log track management system where every user is able to add their hours and access the reports. It has three major roles - Employee, Supervisor, and Manager where the supervision of the hours is tracked according to the roles assigned by the system.
