

Masum Reza

FrontEnd Developer | ReactJS | NextJS

I possess 1.5 year of practical experience in frontend development, specializing in React.js. Proficient in crafting responsive user interfaces, implementing state management, and collaborating with cross-functional teams. Demonstrated ability to transform design concepts into interactive and visually appealing web applications.

WORK EXPERIENCE

ReactJS Developer Antino Labs Pvt Ltd

01/2023 - Present

Gurgaon

Achievements/Tasks

- Developed a strong command over React.js, leveraging its component-based architecture and virtual DOM to create dynamic and responsive user interfaces.
- Successfully designed, implemented, and maintained various reusable UI components, enhancing code modularity and scalability across projects.
- Gained expertise in state management using tools like Redux or Context API, efficiently managing application-wide states and ensuring data consistency.
- Effectively integrated RESTful APIs and utilized asynchronous programming techniques to fetch and display data, enhancing the interactive nature of the applications.
- Utilized Git and platforms like GitHub for collaborative development, maintaining version control and enabling seamless teamwork within the development lifecycle.

Software Developer Intern Kiswok industries pvt ltd

11/2021 - 02/2022

Kolkata

Achievements/Tasks

- Developed a solid foundation in HTML, effectively structuring web content with semantic elements. Created interactive forms, embedded multimedia, and gained expertise in organizing information hierarchically.
- Participated in small projects to apply acquired skills. Built basic web pages from scratch, incorporating HTML, CSS, and JavaScript. Collaborated on enhancing user interfaces, optimizing page performance, and debugging code for smoother functionality.

EDUCATION

B.Tech in Computer Science & Engineering Brainware University

Kolkata

Diploma in Computer Science & Technology(CST) Nibedita Institute of Technology

Murshidabad

SKILLS

ReactJs

NextJS

JavaScript (ES6+)

TypeScript

Material Ui

AntD

Redux Toolkit

React Query

Rest Api integration

Webpack

scrum

PROJECTS

SomeOne Like Me (07/2023 - Present)

- Technologies Used: ReactJS, Redux Toolkit, Material UI, Tailwind CSS, HTML5, and CSS3.
- "SomeOne Like Me" is an innovative online dating application, similar to Tinder, designed to connect individuals with shared interests and preferences. As a Frontend Developer, I played a pivotal role in the development of the entire project, with a particular focus on creating the intuitive and efficient Admin Portal.

LionCharge (08/2023 - Present)

- Technologies: ReactJS,, Redux, Redux Toolkit,, Tailwind CSS, HTML5, and CSS3.
- LionCharge's electric vehicle charging application, created using ReactJS, provides an easy-to-use interface for EV owners to identify and use charging stations. Users may easily locate local charging stations, verify availability, and securely initiate payments.

Devlabs (05/2023)

- Technologies: ReactJS, NextJS, Redux, Redux Toolkit, Material UI, Tailwind CSS, HTML5, and CSS3.
- This EdTech project enables users to purchase courses and offers teachers an opportunity to teach on the platform. It provides a user-friendly interface for course browsing and purchasing, while empowering teachers to create and deliver their own courses. The platform fosters a dynamic learning environment, connecting learners with quality educational content and educators worldwide.

Antino RMS (03/2023)

- Description: Antino RMS is an internal project of Antino. As a frontend developer, I utilized React Redux Toolkit, RESTful API, Redux, and MUI for the layout and CSS for styling. The app allows users to fill up their details, including contact information, educational background, skills, and experience, and preview the data in real-time
