Role
- Full Stack Engineer

SKILLS

JAVA   PYTHON   C++   Data Analytics

Spring Boot   MVC   Data Structures   MySQL

Junit   Operating System   Problem solving

Algorithms

PROJECTS

Spot that Fire
- It is used to predict fire in forests.
  It uses Machine Learning.
  It is real time project.
  Project was made in NASA SPACE APP CHALLENGE 2K18 Hackathon.
  It was a group project including 5 people.

Smart Fitness trainer using Artificial Intelligence

- It is a virtual fitness trainer that will guide users for different exercises without using any sensor. It uses the camera to get your body posture and feed those posture to our self-built algorithms as an input that will use these posture to track your exercise and give you real-time feedback of your exercises. I was Responsible for developing optimistic algorithms for different exercises.

Bank Management using File Handling
- It is designed to manage operations performed in bank in order. We can create new account, deposit and withdraw amount as well. We can also close and modify account details. It can also show names of all account holders. Project was made using C++ language.

ACHIEVEMENTS

Participated in NASA SPACE APP CHALLENGE 2K18 Hackathon and stood 2nd runner up in North India.

Participated in workshop on Ethical Hacking in TRYST 2017 event at IIT Delhi.

Certified in Problem Solving skill (Basic) from Hacker-Rank

Completed 30 Days Of Code challenge in Hackerrank

Got second prize in programmers at war event on WORLD RADIO DAY held at college

OTHER INTERESTS
