I am a Software Engineer having more than 6+ years of experience working on multiple technologies in the FMCG, Fintech And Investment Banking Domain. Experience in Project Management, Designing, and Developing powered with microservices using RESTful APIs. Design programs, testing, and implementing a business system in an agile-based environment. I'm Obsessed with writing maintainable and testable code - complying with industry standards and best practices. Write Technical documentation as functional specifications and system requirement specifications. A proud team player focused on achieving project objectives with speed and accuracy. I love adventures & taking risks learning new things that will help me open up for new opportunities as well as teach me new ideas about life. I am searching for a job that will help me increase my technical knowledge as well as develop my soft skills.

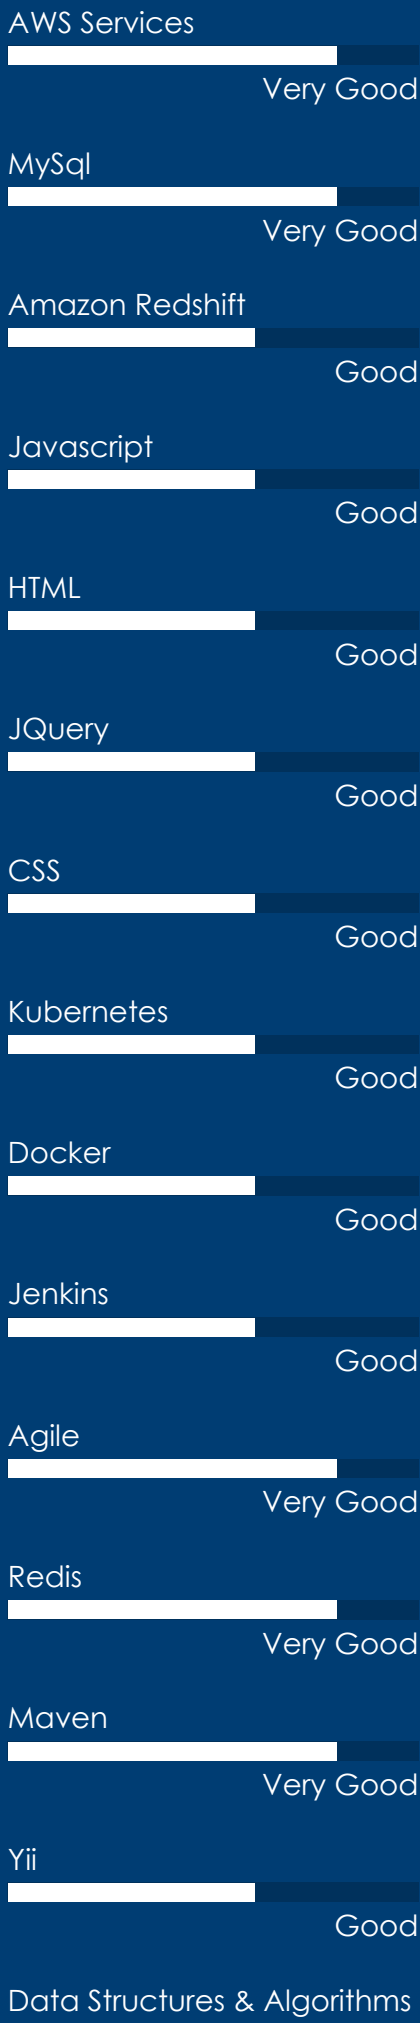

## Work History

2021-08 -  
Current
