Experience

- TechMahindra, Hyderabad
    - Job title**:** Senior Software Engineer
    - Duration**:** April 2019 – till Date

- ZenQ Pvt Ltd, Hyderabad
    - Job title**:** Senior Test Engineer
    - Duration**:** April 2017 – April 2019

- Techmerits Software Solutions Pvt Ltd, Hyderabad

    - Job title: Software Test Engineer
    - Duration: December 2014 – March 2017

Project#1

- **Organization**: TechMahindra
- **Project Name**: Regional Finance
- **Client**: Regional Management Corporation
- **Test Tools**: Selenium (Java) using TestNG, Test Complete, Cypress
- **Role**: Senior Software Engineer
- **Duration**: April 2019 to Present

Description:

Regional Management Corp is a diversified consumer finance company that provides installment loan products primarily to customers with limited access to consumer credit from banks, thrifts, credit card companies, and other lenders. RF offer loan products that are structured on a fixed rate, fixed term basis with fully amortizing equal monthly installment payments, repayable at any time without penalty. We source our loans through our multiple channel platform, which includes our branches, centrally-managed direct mail campaigns, digital partners, retailers, and our consumer website. This provides us with frequent in-person contact with our customers, which we believe improves our credit performance and customer loyalty.

Responsibilities:
- Involving in the preparation of Automation feasibility document.
- Creating a framework and making necessary changes to the existing framework
- Converting scripts in Test Complete to Selenium
- Test automation scripts development and maintenance against changing functionalities for build releases
- Executing automation scripts against each new build.
- Doing POC in Cypress
- Participated in daily stand-up meetings and updating daily status.

Project#2

- **Organization**: ZenQ Pvt ltd
- **Project Name :** Ancestry
- **Client :** Ancestry.com, USA
- **Test Tools** : Selenium (Java) using TestNG
- **Role** : Sr Test Engineer
- **Duration** : April 2017 to April 2019

Description:

Ancestry is a web app for creating family history with extensive and unique collection of billions of historical records which are digitized, indexed and put online for anyone interested in discovering, preserving and sharing their family history. Online community of people interested in their family histories can subscribe and create their family trees, attach ancestry-acquired content, invite family and friends to help build their family tree and add personal memories and upload photographs and stories of their own. Ancestry App also provides opportunity to help friends discover their stories in the family history resource by gifting them a membership.

Project#3

- **Organization**: Techmerits Software Solutions Pvt Ltd
- **Project Name :** ATCOM Reservation System
- **Client :** Thomas Cook, UK
- **Test tools** : UFT
- **Role** : Software Test Engineer
- **Duration** : December 2014 to March 2017

Description:

This complete solution by Atcomres covers the full spectrum of needs of enterprises within the tourism and travel sector. It includes all functional possibilities for interactive communication between prospective or existing customers and their complete servicing via Internet or mobile telephony. It can work in collaboration with existing hotel computer infrastructure, as well as international reservation systems thereby representing an intelligent tool for business growth in the tourism and travel industry
