EXPERIENCE

Software Developer   *September 2019 : Present*
Tikona Infinet Private Limited   *Mumbai*
Software developer responsibilities include designing, developing and delivering high-volume, low-latency applications for mission-critical systems. Roles and responsibilities also include managing Java/JavaEE application development while providing expertise in the full software development life-cycle, from concept and design to testing.

Senior Cyber Security Analyst   *August 2017 : December 2018*
Price WaterHouse Coopers Private Ltd   *Mumbai*
Working as a Consulant, attending to clients to cater to their cyber security requirements. This includes carrying out risk assessments & risk analysis, vulnerability analysis & penetration testing and working on different cyber security tools like CyberArk. Acively worked on developing backend scripts for threat analysis on servers.

Android Developer Intern   *June 2016 : August 2016*
Snehl Total Wellness   *Thane*
Developed an Android application that provides a common platform for doctors and patients associated with Snehl Total Wellness to schedule and track appointments and IM medical queries. Have been performing full stack development including mobile UI and backend server hosting. http://tinyurl.com/zx55h5y

Full Stack Developer Intern   *May 2016 : June 2016*
Magveda Commercial Pvt. Ltd.   *Mumbai*
Developed an improved version of the BreakDoors application that allows home entrepreneurs to sell products online directly and developed a direct relationship with the customers. The app has search, social sharing and chat functionality built into it. Also helped the company with backend scripting and hosting their website (www.breakdoors.com) using Google Cloud Platform. http://tinyurl.com/h4d5ttz

COMPUTER SKILLS

Languages: Java, Python, SQL.
Web Technology: Servlets, JSP, HTML, CSS, PHP, JavaScript.
Frameworks: Spring Boot, Spring MVC, Hibernate, React JS.
Cloud Services: Google Cloud Platform, Amazon Web Services.
BPM Technology: Camunda, jBPM.

OTHER PARTICIPATIONS

1.Made an Online Shopping web application using JAVA Web Technologies and hosted on an Apache Tomcat server.
2.Developed a Chat Application using Sockets and RMI technology. This included chat room functionality as well as one-to-one chat option.
3.Developed a .Net application that includes modules like student/staff details, web based parent access and attendance tracking. Designed and wrote scripts that would run against the database to generate analysis reports.
