lovish.vadhera005@gmail.com

6+ years of professional Software Development experience, in full-stack development with exposure to technologies like Node.js, Javascript, React, React Native, Vue, AWS, MySQL, MongoDB, Web3, Blockchain, etc along with a strong interest and exposure in Software Architecture.

/ WORK EXPERIENCE

>> Senior Software Engineer
One World Nation | Jan 2023 to present
> Co-developing the frontend for a NFT based realtime gaming metaverse on React and React Naitve.
> Building a pixel perfect UI on mobile and app from design to a user friendly application.
> Integrated 3rd party services like moengage, smartlook, unity etc to provide a seamless experience to the user.

>> Senior Software Engineer
Airbase | Sep 2021 to Jan 2023
> Co-developed an automated spend management platform on mobile and web for companies primarily built on React, React Native, NodeJs, Python, Django, MySQL, and Heroku.
> Working with 3rd party APIs like AMEX, SVB, and Marqeta to bring a fully automated spend management solution for their corporate card users on Airbase.
> Collaborating with Product managers to develop the product and bring the product from concept to deployment whilst assuring high coding and testing standards.
> Improved the overall architecture of the app improving the number of crash-free sessions to 99.5% on the mobile app leading to an increased rating on the app store.

>> Senior Software Developer
Lepton Software | Nov 2020 to Aug 2021
> Co-developed a KPI Management platform Network360 for Vodafone Idea built on React, Node, MySQL, and MongoDB.
> Built an automated reporting system that was able to generate periodical reports in pdf and ppt format to easily visualize data on NodeJs.
> Responsibilities included managing the frontend team, gathering requirement from the Vodafone team, and converting it into a useable high performant application.
> Built an MVP from scratch to conceptualise a location intelligence platform.

>> Software Engineer
Blocknomic Technologies | Feb 2018 to Oct 2020
> Part of core team developing realtime crypto trading platforms on mobile and web for users across globe using React, React Native , Node, WebSockets, GoLang, MySQL and AWS from scratch.
> Implemented sentry, error boundaries and error reporting for the applications for better error management and incident handling.
> Implemented core services such as trading engine and order fulfilment engine on Node and Go.

/ EDUCATION

>> Jaypee Institute of Information Technology, Noida
Bachelor of Techhnology, CSE | 7.0 | August 2014 - June 2018
Started and mentored the game development society
Won Most Innovative Award in robotics

/ SKILLS

> Web and Mobile App Development
> React, React Native, NodeJS, JS, AWS, Unity3d
> Problem Solving & Quick Learner
> SQL and NoSQL databases - MySQL, MongoDB, Firebase

> Agile & JIRA
> Communicating with stakeholders
> Benchmarking and Unit Testing
> Engineering Leadership And Hiring
