Project: Lexis Nexis
Period: June 2019 – September 2020
Role: Developer

Description:

LexisNexis Group is a corporation providing computer-assisted legal research as well as business research and risk management services. LexisNexis pioneered the electronic accessibility of legal and journalistic documents. There are multiple applications and components that facilitate standardization/ normalization, finding citations and Shepardization amongst other functions. We have received the case files and then processed the same. After that, we send the data as xml file to the front-end team. They processed and shown in online. I have been working in the enhancements and automations of the project.

Roles & Responsibilities:

- Worked in Production Support Environment as well as enhancements.
- Involved in Job Monitoring.
- Involved in analyzing the Packages, Stored Procedures to find root cause for issue.
- Developing PL/SQL Scripts for business Requirements.
- Creating Triggers and procedures as per business requirement.
- Incident Management and RCA Analysis and fix.
- Preparing and Executing Unit Test cases.
- Data Analysis using SQL Queries.
