Summary

Dedicated and skilled Java Microservice's Developer with 4.5 years of hands-on experience in developing, and deploying robust and scalable microservices solutions

Skills

Technical Skills:

Core Java • Java8 • Spring Boot • Microservices • SQL • Mongo DB • RabbitMQ • Design Patterns • Solid principles • GitLab • GitHub • Azure pipelines • PCF • Jira • Azure TFS

Experience

LTIMindtree Bangalore
Senior Software Engineer 07/2021 - Present

Navigation client 12/2023 - Present

- It is a navigation-based company that primarily focuses on automotive devices and portable navigation devices.
- Responsible for migrating JDK from Oracle to OpenJDK to reduce licensing costs for the client, saving 9 million Euros per year.
- Update the codebase to align with the supported features of OpenJDK.
- Developed microservices to enhance the functionality and scalability of navigation client applications like Location Based Services.
- Managed Map Data Service to efficiently fetch geographic data layers for integration within the navigation application.

Technology company 07/2021 - 12/2023

- Is responsible for sending invoices to its customers all over the world and keeping track of them.
- The communication can take different forms (email, SMS, WhatsApp messages, fax, etc.) based on user preference.
- Successfully developed and deployed scalable microservices to process and analyze millions of records efficiently.
- Implemented messaging systems for asynchronous communication between microservices using RabbitMQ.
- Worked with both relational and NoSQL databases as required by the application.
- Led daily stand-up meetings to ensure daily alignment, remove blockers, and enhance team productivity.

Tata Consultancy Services Hyderabad
Assistant Systems Engineer 07/2019 - 02/2021

- Life Insurance client
- Gathered and analyzed functional requirements, transforming them into technical specifications.
 - Worked extensively on insurance products such as Term Life, Whole Life, and Universal Life Insurance, leveraging microservices.
 - Developed RESTful APIs to facilitate communication between microservices.
 - Implemented stringent regulatory compliance measures within the microservices to ensure adherence to regulatory requirements.
 - Achieved cost savings of nearly \$20 million annually for the client.

Education

Annamacharya Institute of Technology and Sciences Rajampet
B.Tech in Computer Science and Engineering | CGPA: **7.46** / 10 05/2015 - 03/2019
