PROJECT EXPERIENCE

1.Project : Cisco (CPQ, Financialforce PSA & Einstein Analytics)
Role : Dev lead(Current project)

- Implemented OOTB Financialforce PSA package and Einstein Analytics functionalities
- Gave virtual training on FinancialForce PSA and Einstein Analytics to onshore-offshore team of 13 people.
- Continuous onshore USA interactions for customer requirements and implementing them with strict time lines. Complete Involvement in the Sprint planning.
- Created Apex, triggers, flows, Process builders, Lightning Web Components, DLRS(Declarative lookup rollup summaries), External Objects etc for the deliverables.
- Created POCs for a few requirements.
- Did deployment via GIT.
- Created reports and dashboards on Einstein Analytics.
- Got appreciated from the clients for going out of the way to deliver the requirements.
- Worked on AHA tool and Rally.
- Created detailed documents on Einstein Analytics implementation in the project for client and intra-team reference.

2.Project : Antea group (Financialforce PSA & Lightning Web Component)
Role : Developer(May - June)

- Worked on triggers, Flows, Process Builders, Validation Rules, Custom Metadata, Custom Settings, Data security, DLRS etc.
- Implemented OOTB functionalities of Financialforce PSA and Lightning Web Components for the requirements.
- Sprint deadline was too tight so put many extra hours for smooth finish.
- Worked on Data Migration using Data Import Wizard and Dataload.io.
- Responsible for deployment via ANT between orgs.
- Provided demo to Product Owners and other intra-team members.

3.Project : Allegis (Financialforce & Aura components)
Role : Developer(April)

- Took internal training and completed Financialforce academy modules.
- This was a change order where a few core FinancialForce PSA implementation and creation of basic aura components was required.
- Worked on triggers, Process builders, Validation Rules, DLRS(Declarative lookup rollup summaires) etc.
- Deployed via ANT and implemented requirements with strict timelines.

4.Project : Microfocus (CPQ)
Role : Developer(January - March)

- Implemented OOTB functionalities of CPQ(steelbrick) package.
- Took internal training and training from Salesforce on CPQ.
- Gave sessions on CPQ as a part of internal training.
- Analysis of Requirement and work with the team to come up with solution.
- Took ownership of functionality from the functional story till the testing done.
- Worked on Formulas, Static Resource, Custom Settings, Custom Metadata Types, Validation Rules, Workflow Rules, Process Builder, Triggers, Apex etc
- Worked on Advanced Approval Process.
- Giving demo of the functionality to onshore offshore team members and the Product Owners.
- Mentored 2 resources during the course of project.

5.Project : Vertex (Lightning Web Components)
Role : Developer(August - December)

- Learnt Lightning Web Components on my own and gave sessions on LWC as a part of internal training.

- Created approval process, Apex, Triggers, Validation Rules , Process Builder, Workflows and Lightning Web Components for the deliverables.
- Helping other teammates in providing technical solutions.
- Worked on SLDS, LDS, platform events etc
- Giving demo of the functionality completed to the internal team.
- Created test cases and did unit testing and did deployment via Ant.

6.Project : Rakuten Inc.(Visualforce & Aura components)
Role : Developer(March - July)

- Got trained in Japanese Language for better onshore(Japan) team interactions.
- Cleared JLPT(Japanese Language Proficiency Test) N5 and got trained in N4.
- Communicate with onshore(Japan) team for requirement gathering and solution designing.
- Built custom solutions with Apex and triggers and participated in Code and solution design review.
- This was a community cloud Project. Since it was an SNS, UI and response time were important factors for the client.
- Used JSForce, JSRemoting, REST, JSON for backend calls.
- Worked on Apex, Visualforce, Aura Components, Triggers for implementations of a requirements.
- Used Javascript, CSS, JQuery, Bootstrap for the UI according to the UX given by client.
- Worked on asynchronous apex like future methods and batch classes.
- Created test cases and did regression testing.
- Assist in deployment and release management.
- Implemented the Knowledge articles in community.

7.Project : Hitachi Building System(VisualForce)
Role : Developer(October - February)

- Building solutions using salesforce Apex, Triggers and Visualforce.
- Worked on Workflows, Process Builder and Validation Rules.
- Worked on CSS and Javascript to change the existing UI.
- Created detailed documents of test cases for regression testing, created test classes and did regression testing.
- This was my first project in Appirio after training.
