WORK EXPERIENCE

Software tester Mphasis limited

02/2018 - 07/2018

Pune

Achievements/Tasks

- Managed card creation and activation in a mainframe testing environment on an application called TSYS for the customers requesting new accounts which led to increase in clientele,
- Wrote test cases to implement new schemes and offers on different card types to achieve required results requested by the client,
- Logged in activities on the cards in a production environment.

Delivery Software engineer Mphasis limited

06/2014 - 11/2017

Pune

Achievements/Tasks

- Aced in performing duties as an application SME, like supporting and hosting engineering applications (mostly CAD, PLM products/applications) at used end,
- Monitored application licenses to reduce over usage of the license and to reduce the incidents caused by server crash,
- Provided solution to the team lead to delete (clean-up) the application licenses to reduce server load,
- Extracted incident data reports to identify the unusual number of defects logged for a single application and performed root cause analysis,
- Performed server health checks to ensure applications are up and running. Automated and implemented scripts to run scheduled jobs in order to decrease man hours spent on this task,
- Worked closely with the UAT team to create and get RFC's (Request for change) approved and the migration team to specify requirements gathering to help build the software installation packages for the client server team,
