### SYNOPSIS

A professional experience with 4.4 years IT Software as QA with Manual Functional Testing and API Testing, Utilize keen analysis and insights of technological aspects to drive organizational improvements and implementation of best practices. Well versed with efficiently handling all activities and maintaining Quality and Dedicated and highly ambitious to achieve personal goals as well as the organizational goals.

---

### PROFESSIONAL DETAILS

- 
- ✓ **PROASPIRE Infotech Pvt Ltd, Bangalore** - Working as **Test Engineer** from Dec 2018 till present

---

### EDUCATIONAL QUALIFICATION

- 
- ✓ **Completed Bachelor's Degree from Acharya Nagarjuna University**

---

### Technical Skills

---

<b>Operating Systems</b>	Windows
<b>Technologies</b>	Rest API Automation with SOAPUI
<b>Tools</b>	SOAP UI, POSTMAN, REST Client and Fiddler
<b>Testing Tools</b>	Manual Functional Testing, API Testing and Database Testing
<b>Web Services</b>	SOAP and REST
<b>Database</b>	MySQL and SQL
<b>Methodology</b>	Agile, Waterfall and V-Model
<b>Other Tools</b>	SQL, XML, JSON, JSON Path

---

### PROJECT SUMMARY

- A Dynamic professional with around 4.4 Years of competitive experience in QA-Testing.
- Having 2+ Years of Experience in Restful API Testing with POSTMAN
- Good Domain experience on E-Commerce and Retail application
- Hands on experience in Restful services Testing using POSTMAN Tool
- Good understanding of CRUD operations to perform Web services Testing
- Good exposure into JSON , URI , WADL , HTTP and Headers
- Execute the APIs into POSTMAN tool and validate the response data with snippets and Json Path
- Expertise into Variables, API chaining, Data Driven and Newman commands in Postman
- Exposure on JSON viewer and validate the same with Json Path and Other tools
- Strong knowledge in Parameterization and variable concepts
- Good experience into Environment setup and Newman commands
- Basic exposure into the SOAP UI tool for API Testing with Assertions, Properties and Property Transfer
- Good understanding of the Authorization concepts for Header design for API Testing
- Exposure and knowledge on the various content types of API testing with POSTMAN
- Good Exposure into Software Development Life Cycle, Software Testing Life Cycle, Bug Life Cycle
- Analyzing the user stories and script the test scenarios and Test cases
- Understand the Test plan, RTM and Swagger files and tracking the issues
- Experience to execute the Test cases onto JIRA tool and reporting the bugs for the same

- Well acquainted with Smoke testing, Sanity, Functional testing, Regression testing, Re-testing, End to End Testing and Risk Based Testing
- Strong expertise in SDLC and Software Testing life cycle methodologies (V-Model, Waterfall and Agile)
- Experience to participated into different meetings like QA-BA and QA-DEV calls
- As a member of the Scrum team participated in daily standup meetings, project status meetings as well as retrospective meetings and iteration reviews.
- Expertise in Functional Testing, End to End Software Testing, Integration Testing, Regression Testing and Smoke testing for Web Application and oracle based applications.
- Experience to perform Database Testing using SQL Queries for validate data
- Experience in Bug Reporting, Bug Tracking using various Bug Tracking tools (JIRA).
- Experience on Software Development Life Cycle, Software Testing Life Cycle, and Defect life Cycle
- Work Experience into Agile – Scrum Frame work environment
- Highly motivated with an ability to meet tight deadlines and perform multiple tasks simultaneously.

---

## **PROJECT DETAILS**

### **Project 1:**

**Project Name : Neiman Project**

**Client : Neiman Marcus**

**Team Size : 10**

#### **Project Description:**

Neiman Marcus Group, Inc. is an American integrated luxury retailer Neiman Marcus is still in operation today under the original name and is still headquartered in Dallas, where it was founded. The Neiman Marcus Group comprises the Specialty Retail stores division including Neiman Marcus Stores and Bergdorf Goodman. These retailers offer luxury apparel, accessories, jewelry, women's clothing, men's clothing, kids, beauty, and decorative home products

#### **Responsibilities:**

- Analyzed system requirements specifications developed Test plans, Test Cases, Test Data for manual testing of the functionality.
- Test Planning for Agile Scrum and attending Synch up calls with on-site module leads to resolve issues
- Accountable for reviewing requirements and obtaining clarifications from product Subject Matter Experts
- Instrumental in authoring Test Approach & Scenarios, Reviews for the respective projects, test artifacts
- Allocation of Task based on Scrum meetings followed by estimations, mentoring the team
- Responsible for design RTM document.
- Participated in Defect management meetings with the development, design and Subject Matter Experts.
- Good understanding on URI, HTTP Methods and HTTP Status codes.
- Good experience to use JSON payload and validate the same using third Json path tool.
- Experience to use Headers and Authorizations on postman tool.
- Hands on experience to use Collections for data/endpoint Parameterization
- Reviewed test cases as per business requirements, ensured implementation of testing techniques wherever required and coverage of positive and negative scenarios and finally get them signed off from client.
- Training & Mentoring new joiners.
- Executed Test cases into Dev Test, Staging and production Environments
- Performed smoke testing, Re-testing, regression testing, exploratory and Ad-hoc testing
- Attend daily scrum meeting.
- Prepared the Daily status report, Weekly status report and Sprint wise reports
- Experienced into sprint demo meetings
- Proficient in SQL Queries to test the data after executing transactions

- Attending in Daily scrum calls, Story Analysis calls with onsite team to discuss the work progress.
- Participate in Daily standup calls, Bug Triage calls and status meetings.

**Technologies/Tools:** REST, API, POSTMAN, JSON, JSON Path, Agile, JIRA, HTTP, SQL and URI

---

**Project 2:**

**Project Name : URBN Project**

**Client : Urban Outfitters**

**Team Size : 10**

**Project Description:**

Urban Outfitters, Inc. (URBN) is a multinational lifestyle retail corporation headquartered in Philadelphia, Pennsylvania. Operating in the United States, the United Kingdom, Canada. Urban Outfitters, Inc. (URBN) carries multiple stores within the URBN portfolio of brands, which also includes Anthropologie, Free People, Terrain, BHLDN and the Vetri Family restaurant group. Much of the merchandise is designed and produced by the company's wholesale division on these multiple private labels.

**Responsibilities:**

- Understanding and Analyzing the User stories and identify the scope of the API impact
- Understand the Test plan , Swagger, SRS and service for API and Web application Testing
- Involved into Initial planning meeting for discussing the sprint board and priorities
- Mapping the business needs and requirements by understanding and analyzing the service documents
- Hands on experience into design the Test scenarios and Test cases
- Experience to execute the test cases in JIRA tool and created the defects
- Logging the defects into JIRA and closed the same with JIRA work flow
- Involved and experience into each phase of SDLC and STLC of the Testing
- Exposure into URI, API, HTTP, Headers, JSON and JSON Path
- Experience to execute the APIs with POSTMAN Tool and SOAP UI tool
- Good understanding of JSON Payload and exposure using Online evaluators
- Validate the JSON Response data and Http Status codes ensure APIs execution status
- Using Snippets for validate the response and implement the API chaining
- Experience to use Collection, Global and Environment variables
- Hands on experience to perform Data Driven Testing using POSTMAN
- Setup various environments for APIs running with different configurations
- Validate data from Database using SQL queries
- Log the defects using JIRA Tool and report and closed the same
- Participate into sprint planning, Review, Daily, Triage and Retro meeting
- Experience to write the Test cases for both Web based and API services
- Maintain and Run the Test cases using JIRA Tool
- Perform various Testing : Smoke, Sanity, Functional ,Ad-hoc, Exploratory and Regression Testing
- Prepare and send the Reports: Daily, Weekly and Sprint wise

**Technologies/Tools:** API, POSTMAN, Agile, SQL, JIRA, JSON and Json Path
