Dynamic Production Planner with success in supporting production operations and supply chain management in Semiconductor Manufacturing environments. Highly adept and detail-oriented in developing production schedules, promoting operational efficiency, managing inventory and coordinating logistics. Proven history of managing complex production schedules aligned with sales forecasting and customer order deadlines. Expert in maintaining meticulous records to identify aspects needing improvement and develop solutions.

## Skills

---

Supply Chain Management

Automation understanding

Proficient in Oracle

Cross Cultural & Cross Functional Team collaborations

## Work History

---

2019-11 - Current

### Production Planner

*Denselight Semiconductors Pte, Ltd., Singapore*

- Worked directly with production personnel to resolve production scheduling issues and conflicts.
- Reviewed raw materials inventory stock and reordered to maintain supplies for production.
- Planned and established production schedules and optimized control levels for diversified manufacturing operations.
- Developed, released and monitored daily schedules to foster on-time completion of finished products.
- Reviewed inventories, tracked production statuses and ordered materials to foster consistent availability and production schedule adherence.
- Involved in Customization and development of Odoo system to support factory production initiatives from order scheduling to shipment.
- Conferred with managers, sales teams and engineering personnel to revise plans and achieve demanding targets.
- Worked with Cross functional supervisors and team members to understand supply needs and bring levels within desired tolerances.

2011-09 - 2019-11

### Senior Production Planner

*Lattice Semiconductor (PH) Corporation, Muntinlupa, Philippines*

- Key Contributor in 2017 Oracle Implementation Project
- Plan, direct and coordinate production activities for multiple offshore subcontractors located Japan, Indonesia, Taiwan, Malaysia, USA. From Foundry to OSAT.
- Direct, develop and coordinate both short-term and long-term production plans to ensure customer commitments are met
- Lead in coordination and support for qualification of new OSAT (Offshore Assembly and Test) site
- Work to schedule orders, resolve material shortages, and identify capacity constraints and other potential schedule interruptions
- Responsible for coordinating product schedules through the production cycle.
- Support product launch through managing availability to delivery of material and data requirement
- Monitoring delivery commitments to maintain and improve original scheduled date
- Provides input to management; interfaces with Marketing, Sales, Production and Engineering Management to provide leadership and coordination in support of projects and daily actions.
- Coordinate with Finance and Accounting in matters involving inventory budgets, purchase request and cost.
- Monitor and reviews individual performance, provides feedback and coaching individuals within the team
- Internal Auditor for ISO certification
- Support new product introduction (NPI) launch through managing availability to delivery of material and data requirement and works with Engineering and Planning leads to understand requirements for timely launch.
- Responsible for direct purchasing of raw material base on demand replenishment model
- Reviews supply-related requirements with Logistics to determine faster turnaround shipping time that support the requirements of the business

2007-05 - 2011-09

## Customer Planning Specialist

*ZiLOG Electronics Philippines Inc, Taguig, Philippines*

- Wafer inventory management
- Manage allocation of constrained materials (e.g. wafers and dice)
- Support product launch through support of delivery (e.g. units and wafers) and data requirement
- Monitoring delivery commitments to maintain and improve original scheduled date
- Manage backlog through thorough review and coordination with counterparts to meet commit schedules
- Purchase request preparation

## *Education*

---

1999-06 - 2004-03

## Bachelor of Science: Electronics And Communications Engineering
