Internship

Worked as Web Developer – Intern (4 months) at Fix Nix GRC Solutions, Chennai.

During this period, I am into two different projects. They are

1. Time Tracking System for Employees.

Description: Admin keeps the track of company employee Details, who has been working in the company. Admin assigns projects and tasks to the employee's team. Employees should complete the project within the given period of time. Admin makes salary bills according to the employee working hours.

Technologies: LAMP, PhpMyAdmin

2. Whistle Blower:

Description: We mainly use this system in banking. If any illegal thing happened in **the** bank or else in other company. We can complain to the manager or who leads it, by submitting the proofs to them without mentioning the complainer details. The investigator investigates the complaint by checking the proofs given by the complainer is true or fake then he takes action regarding the complaint, otherwise rejects the complaint.

Technologies: LAMP, PhpMyAdmin

Projects:

- **Academic Project1: News Paper Agency Automation System** (web application)

Description: In this application different types of Newspapers and Magazines are available for the customer and the same can pick this interest one, by placing a data through online.

Technologies: LAMP, PhpMyAdmin

- **Academic Project2: Human Secure** (Mobile Application)

Description: This is used to give security for humans while traveling or any suspicious condition then the user can shake the mobile to send a message and current location to selected contacts in-app. Used tool or IDE is Android Studio using java.

Technologies: Java, XML, Android Studio

Languages Known: Telugu, English
