Work Experience

❖ Working as a DBA in Perfexion Information Technologies Ltd Mar 2020 To till date.

Technical Skills

- Database   : PostgreSQL, DB2
- Operating Systems   **:** Red Hat Linux, Centos and Windows
- Languages   **:** SQL, COBOL, JCL and VSAM.
- Enterprise DB Tools   : PEM, OEM, Opensource Tools: pgbouncer, pgpool and pgbadger.
- Contribution Tools   : Postgres pgAdmin.
- Amazon Cloud & Azure : AWS Architecture (RDS, EC2, S3, AZURE Databases

Assignment-2:

Client	:	Feature Group
Role	:	DBA
Duration	:	Dec 2022 to Till Date
RDBMS	:	PostgreSQL
OS	:	Windows 7, LINUX

❖ **Roles & Responsibilities:**

- Installed PostgreSQL installation, Configuration on Linux and Windows.
- Created Schema roles and users.
- Granting and revoking privileges to users on tables.
- Verifying and analyzing logs regularly.
- Finding fatal, error, warning and hint from logs and providing the resolutions.
- Generating pgBadger report for daily logs.
- Send graphical based log reports to clients/TLs.
- Finding a-optimized long running queries.
- Sending long running query reports to the Customer.
- Maintaining the database by regular vacuum, analyze operations.
- Generated pgbadger reports and investigated the time consuming queries from reports
- Worked on normal files to Encryption format.
- Monitoring load on PostgreSQL database server.
- Verifying of logical backups every day.
- Planning with TL for online backups to reduce data loss.
- Configuring backup options using online backups.
- PostgreSQL upgrades between various major/minor versions.
- Synchronous/Asynchronous Replication.
- Worked on Setup Streaming Replication and DR setup.
- Performed replication setup using Streaming Replication, Cascade Replication.

- Performed Connection pooling using pgBouncer and pgpool.
- Performed Postgres Enterprise Manager

Assignment-1:

Client	:	APT Online
Role	:	DBA
Duration	:	January 2015 to Dec 2022
RDBMS	:	PostgreSQL / MySQL
OS	:	Windows 7, LINUX

Roles & Responsibilities:
- Database security, creating users, and managing permissions.
- All database backup management, Maintain and update automated DB backup and recovery.
- Manage Database in Production, Test, Develop environments, including the installation, configuration, backup, recovery, upgrades, schema changes, Development support etc in Windows and Linux Servers.

- MySQL server optimization by analyses
- Implement and maintain database health monitoring servers.
- Demonstrated experience in troubleshooting and resolving database problems.

- Document and update procedures and processes.
- Participate in on-call rotation for critical issues.
- Installation and configuration of replication (Single Master & Multi Master).
- Installation and configuration of Slony Replication.
- Installation & configuration of Cent OS and Ubuntu on Server System HP, Dell, Sun, IBM.
- Installation and configuration Nagios and OPM.
- Migrated from MySQL to PostgreSQL Plus Advance Server
- Involved in Oracle to PostgreSQL database Migrating activity.
