PROJECT DETAILS

● SharePoint Integration (ITFC)

It's a reverse integration means it will trigger the integration when contract gets created in ContractPodAI and reach particular stage, after triggering JB it will read all the information and store it to the SharePoint with Attachment.

● HubSpot Integration

When deals get created in and the deal stage get changed in the HubSpot it will trigger the Integration and create contract in ContractPodAI.

● Cue Health Integration

Reading CSV file from FTP and created ContractPodAI contracts. According to the Application Types.

● Kresge Contract Update Integration

Reading CSV file from FTP and updated ContractPodAI contracts balance. If we have "KF" in the Request Id then reading existing contracts id using SQL query and update the balance and few other fields otherwise directly updating.

● Endo Integration

Reading CSV file from FTP and created Vendor/Client in ContractPodAI instance with Error notifications.

● FallCreek Integration

Reading data using the FallCreek Api and writing it to the database and also added pagination logic and error notification.

● Vault Integration

Reading PDF file using custom property like Item Number and then adding that pdf file name I csv file. Reading the Invoice pdf and merge the pdf which we are writing location info with the PDF file name and store it to the Linux Server.

All these works are done in .bat file and running run command plugin through Jitterbit.

● Jitterbit Projects Metadata

Getting all project details based on env id and getting Operations Logs, Project Variables, Scripts, Source, Targets, Schedulers, Deploy Logs/History, Operations Options/Settings, etc.

● Rifle Order Integration

Done project for Rifle order and Shipment processing. Reading JSON files and passing it to the SAP B1 using rest API's. Reading all the files from FTP. For Brandwise and Amazon the files are in CSV converted it into JSON.

● True Manufacturing Integration

Did integration for True Manufacturing US based company on JDE to Salesforce Account, Open and Shipped order integration.

● Arctic Wolf Integration

Did integration for Arctic Wolf US based company. Done integration on Salesforce to NetSuite Sync Accounts, Opportunities, Products and Invoices.

● EPIC-FHIR - Salesforce

Through integration feed forms in Epic. Get patient detail from Salesforce and pass it to EPIC-FHIR.

Integrate account detail from Salesforce to EPIC-FHIR

Integrate contact detail from Salesforce to EPIC-FHIR

● Cherwell - Jira Integration

Integrate Jira issues to Cherwell development request and also integrate comments.

● JB Logs to Loggly, Apache Kafka, Elastic Search, and Splunk

Get Jitterbit logs and insert it into Loggly, get loggly latest inserted logs and insert into Apache kafka, get kafka logs and insert into Elastic Search and Splunk.

● PLM Demo

Created demo for PLM to Epicor and send slack notification when part gets created in Epicor.

TEMPLATES WORKED ON

● Worked on Salesforce CPQ to SAP ECC templates.

● Bidirectional NetSuite Contacts to Dynamics CRM Contacts

● Bidirectional Magento Customers to NetSuite Customers

● Workday Workers to ServiceNow Request

● Onboarding /offboarding employee Workday to ServiceNow

● Workday Sales Items to Salesforce Product

● Salesforce Contacts to NetSuite Contacts, etc.

● Worked on 30+ templates for CS (Cloud Studio).

PLUGIN DETAILS

● JWT Token Generation

Read file from Studio and make a JWT Token on the basis of given algorithm from file.

● Convert EBCDIC To ASCII

Developed plugin to convert EBCDIC data to ASCII for True Manufacturing

CONNECTORS DETAILS

● Cherwell

Created operation Get users, Post users, Update and Delete all objects.

● Magento

Created operation Get, Post Customer object.

● Epicor

Created operation Get, Post, Update, Delete all objects.
