Description:

E-learning is another form of distance learning where education and training courses are delivered using computer technology. Typically, this means that courses are delivered either via the Internet, or on computer networks (linked computers). With the increased availability of PCs and Internet access. E-Learning is a web application using JSP.

This online application enables the end users to register online, select the subject, read the course and appear for the exam online. The results of the exams are also declared just after taking the test. The candidate should take tests in a particular sequence and also he can attempt the next test only if he has completed the previous papers. The correct answers for the questions are displayed after the exam. The date of the registration, date of exam, test results etc. are stored in the database.

Mini project:

Title: EXAMINATION SEATING ARRANGEMENT SYSTEM

Description:

This project is developed for the college, to simplify examination hall allotment and seating arrangement manual work. It facilitates to access the examination information of a particular student in a particular class. The purpose of developing this seating arrangement system is to provide a way to allocate exam hall for each student without any clash. Mostly students are facing many problems for finding the exam hall, so a newly invented concept helps for the staffs to generate their exam hall arrangement easily. This project also allocate particular invigilator for particular hall. It is also very useful for the college where the software may generate the hall separation and concerned reports. Hence manual Excel sheet and paper work is automated based on their departments and register numbers.
