76%

Projects

The Smart Building Energy Management System

Home owners will be able to receive feedback status of any home appliances under control whether switched on or off remotely from their mobile phones. PIC16F887 microcontroller with the integration of GSM provides the smart automated house system with the desired baud rate of 9600 bps.

RFID Based Documents verification

Radio Frequency Identification (RFID) refers to a wireless system comprised of two components: tags and readers. ... Tags, which use radio waves to communicate their identity and other information to nearby readers, can be passive or active. Passive RFID tags are powered by the reader and do not have a battery.
