- ☐ Summer Training in Cetpa Pvt Ltd.
- ☐ Online training of NodeJs through Udemy online courses.

PROJECTS DONE

- ☐ **Identification using eye detection** : This project was undertaken as a final year undergraduate project. The main objective of this project is to identify a person from his eye image. First, detecting the eye from an image using an external application and then matching the person's eye image properties with the properties saved already in the database. This is a working project and got appreciation from the final assessing committee.
- ☐ **Vendor Engagement using Web Designing** : This project is done for learning java and web designing. In this, developed three modules for vendor, customer and admin. Admin were given access to handle vendors and customers activity. Vendor developed for managing products, discounts etc. and customer module is for different activities like purchasing, returns etc. All modules integrated well and worked fine.
- ☐ **Learning Link Foundation(LLF)** : This project is done during an internship in Kloudrac Software Pvt Ltd. In this, any foundation or organisation manages their record and details on their website. It is developed by integrating the works done in Salesforce and Heroku. Records of that foundation related to expenses, procurement, task and timesheet, etc regulated in a real time application.
