PROJECTS

1. PLATFORM MIGRATION(B2C)

The client wanted to migrate to B2C from their existing platform. Created a custom dynamic FAQ display and search functionality.

Role - Customized different page and made them with content assets and manage them. **Technology**

- HTML, Tailwind, JavaScript, Service

2. PROTEIN SUPPLEMENTS FOOD (B2C BUSINESS SFRA)

This project is centred on the Protein cookies and protein related products And Client is Australia based want all his website pages good and only used Tailwind not bootstrap.

EDUCATION

BACHELOR OF TECHNOLOGY IN
COMPUTER SCIENCE E
ENGINEERING

AIET, RTU University, Kota (Raj.)

3. BIRTHDAY CARDS AND GIFTS APP (B2C COMMERCE CLOUD)

This Project is based on converting web to app and I created Homepage and CLP page by Page designer. And category , add to cart and other API's by OCAPI HOOK implantation returning JSON response.

Role - Create API's by OCAPI and HOOKS and also a controller that returning the JSON response to us that help. to build the app design.

Technology - OCAPI , HOOKS , API , JS.

4. DELIVERY SOLUTION LINK CARTRIDGE (B2C)

In this Link, Cartridge Client wants us to build the solution for users to put a new shipping method. Need to put that new shipping method on the PDP page too and deliver the product from nearby according to Pin code of the user area

Role - Create Jobs based on order and change its status with job and marketing integration in commerce cloud and so many UI changes on almost every page.

5. FURNITURE SITE (SITE GENESIS CONTROLLERS)

Created site with different category hierarchy and also client want some integration and custom created pages using SFRA B2C. And also want simple checkout flow with multiple payment methods.

Role - Test Code Coverage and Job for Fetching order. **Technology** - HTML, CSS ,JavaScript , jQuery ,Jobs , Services.
