WORK EXPERIENCE

Senior Engineer, Asset and Solutions Group (ASG)

Deloitte India (Offices of the US)

06/2021 - Present

Achievements/Tasks

- Working on the Core Connect Engine - an industry-agnostic framework developed using Lightning Web Components to accelerate development across multiple client projects by factoring in an MVC model using a configurable Process framework and third-party APIs/Apex Classes or SOQL Queries to support custom flows/orchestrations as well.
- Responsible for leading the development team, along with designing and maintaining the Core Connect application. Handle Code reviews and provide architectural and implementation insights on technical user stories.
- Core Connect provides admins with user-friendly and intuitive UIs to configure different data layers and cards which can be plugged in on different components/pages to ensure reusability and ease of use.
- Core Connect reduces the development effort for each team by ~60% along with providing a holistic architecture, a lower Time-to-Market period of ~50% and a longer shelf life due to its flexible and dynamic nature.

Project Lead, Research & Development(R&D) vertical

Axtria India, Gurugram

06/2016 - 06/2021

Achievements/Tasks

- 5 years of IT Experience in design, development and implementation of various stand-alone and client-server architecture based applications.
- Responsible for coordination between internal teams and stakeholders to understand user requirements and provide technical solutions. Handle code reviews and security checks to ensure quality standards and standardized processes as per compliance.
- Skilled experience in Lightning Web Components for providing modern UI components to the end users, Python for Data Manipulation and Integration purposes and SQL, Redshift for database connectivity for third party data to drive improvements throughout entire software development lifecycle.
- Implemented a Data Management System which consumes client data and pushes it into various databases such as SQL, Redshift etc, and a Reporting System that prepares data for the client's reporting with stunning visualisations using chart.js library.
- Developed Goal Setting and Management by Objectives (MBO) modules using Salesforce Lightning framework, Python, AWS and Web Technologies.
