PROFESSIONAL SUMMARY

- Having 3.2 years of experience in IT industry.
- Strong Knowledge of SFDC standard Data structures and familiarity with designing Custom Objects and Force.com platform and Force.com Sites.
- Experience in understanding business requirements to design the required entities like custom objects, creating the relationships and junction objects.
- Developed Apex classes using other platform-based technologies like Force.com IDE.
- Experience in creating various Component (Lightning Web Component)
- Experience in using Workbench, Data Loader for insert, update and bulk import or export of data from Salesforce.com Objects.
- Experience in using declarative features like validation rules, workflows, Process Builder, flows automation for satisfying complex business process automation.
- Experience in Development, Administration, Configuration, Implementation, and Support of Salesforce CRM based on Apex language and leveraging Force.com Platform.
- Proficient knowledge of Governor limits. Experience in optimization of existing code in accordance with the governor limits.
- Experience in Deployment process (Change Set & Gear Set).
- Participated in all stages of Software Development Life Cycle (SDFC)
- i.e., System Analysis, Design, Development and Testing Expertise.
- Experience in working on web services and giving solutions by REST integrations.
- Experience in writing Apex Trigger, Batches, Queueable Jobs, future methods, Re-try Mechanism.
- Worked in Agile methodology, JIRA.

TECHNICAL SKILLS

Salesforce.Com Technologies	Apex Language, Apex Classes, Apex Triggers, SOQL, SOSL, Workflow & Approvals, Dashboards, Reports, Custom Objects, Validation Rules, Visualforce (Pages, Components and Controllers), Import Wizard and Data Loader, Lightning.
ETL/ Integration Tools	Force.com, Data Loader, GitHub
Web Technologies/ Tools	HTML, CSS, JavaScript, Visual Studio code
Languages	Apex, C, Java, SOQL, SOSL
Database	MySQL
Operating Systems	Windows Variants

EDUCATION

- | | |
|---------------------------------|----------------------|
| • Bachelor of Engineering (CSE) | Aug 2013 – July 2017 |
|---------------------------------|----------------------|

PROFESSIONAL EXPERIENCE

Mirketa Inc: Elixir	August 2022 – Present
Role: Salesforce Lightning Developer / Admin	
Responsibilities:	
<ul style="list-style-type: none"> • SFDC configuration customization programming with Lightning Aura framework APEX Classes Triggers APIs Visual Force SOQL SOSL and implementing new instances of Salesforce com application from scratch. • Developed Lightning Web Components for authentication, rules engine, calculator, dynamic component creation, payment module, posting (manual and private payment), adding recommendation notes etc. • Used Validation, Duplicate Rules to maintain appropriate and unique data into the app. • Designed Validation Rules along with Roll-Up Summary Fields to maintain data quality and consistency. • Debug Apex scripts using Debug Logs and System Log Console to catch Exceptions and execute Governors and Limits. • Designed and modified Approval processes and created Approval steps which used email alerts and field updates. • Created Many-to-Many relationships and created Junction objects to implement Roll-up Summary fields to aggregate data from child records on the parent. • Made Custom Pages using Visualforce. • Made Triggers on custom objects. • Achieved 90% code coverage for all the triggers. • Designed Custom Lookup in LWC 	
Environment: Salesforce.com, Apex, Visual force, triggers, Custom Objects, Custom Tabs, Email Services, Sandbox Data loading, Integration Techniques, SOSL, SOQL, AppExchange, data loader, report, dashboard, Force.com IDE, Lightning	

Bit hub: Mosaic (A finance domain company)	March 2020 -May 2022
Role: Salesforce Developer	
Responsibilities:	
<ul style="list-style-type: none"> • Involved in gathering and analysing of business requirements and then effectively took part in sprint. • planning to achieve the requirement. • Analysed the business process of client and then involved in creating the application and data model. • Required for the requirement. • Publish platform event. • Creates custom applications, objects, tabs, fields with the custom functionality to efficiently meet the business requirement. • Defined lookup and master-detail relationships on the objects and created junction objects to establish connectivity among objects. • Customized page layouts for Opportunities, Contacts, and Accounts depending upon user profiles and created permission sets where necessary. • Responsible for setting up Filed Level Security. • Developed custom Workflows and Assignment Rules for case escalation. • Implemented Field Level security for sensitive data holder fields. • Implemented Salesforce automation using email-to-case, assignment rules. • Created and used Email templates in HTML and In Apex code. • Involved in integration work related discussion. • Involved in end-to-end testing and gathering feedback from business users. • Involved in Working with Standard Salesforce features like Objects, Workflows, Record Types, Page layouts, Workflow Rules, Case Assignment Rules, and Validation rules, Profiles, Roles etc. 	
Environment: Salesforce.com, Apex, Visual force, triggers, Custom Objects, Custom Tabs, Email Services, Sandbox Data loading, Integration Techniques, SOSL, SOQL, AppExchange, data loader, report, dashboard, Force.com IDE, Lightning
