

Summary

Motivated Individual with technical expertise and business acumen necessary to translate business requirements and objectives to scalable and successful system solutions. Quickly grasps business priorities to identify optimal solutions.

Experience

Intellect Design Arena

Product Analyst, Chennai, Tamil Nadu
03/2019 - Present

- Working as a Business Analyst and configured critical changes gathering and understanding user requirements for **Middle East clients (BBK and BURGAN)**.
- **Onsite experience at Bahrain** for 7 months (Nov'19 - Jun'20) for SIT, UAT and Go-live support.
- Interacted with clients to ascertain requirements and expectations for multiple Banking solutions.
- Worked one on one with client by setting up regular calls, meetings, testing along with the client and understanding improvements required to move it for further change if required.
- Adhering to high-quality design principles while delivering solutions on-time and on-budget.
- Producing competent user stories, regular reports including work plan and testing documentation, visualizations on the changes done. Collaboration on readiness, acceptance tests and verified the changes meet client's needs.
- Assisted my manager and lead with analysis of client's business to uncover areas of improvement and implement solutions to address future growth.

Karvy Data Management & Services

Software Engineer, Hyderabad, Telangana
11/2017 - 03/2019

- Worked as a Trainee Developer intern for six month and promoted to be Software Engineer for financial web applications.
- Developed, monitored, supported and tested application performance to identify potential bottlenecks and made required changes in the implementation.
- Involved in working with customers as well to understand the requirement better.
- Worked with both backend and front end applications.

Education

M S Software Engineering

Vellore Institute of Technology, Chennai, TamilNadu
06/2018
Graduated with 8.38 GPA

Projects***INTERFACE MESSAGE HUB***

- Worked on both Integrator and Olive Fabric to showcase difference in performance Level.
- The services are configured and maintained at various environments to make sure the response generated meets the required output. The application that generates response can be the payments or the exchange data resource that has been under setup as per the requirements.

WORKLOAD MANAGEMENT SYSTEM

- Business Object will be used dynamically by employee to update workload every 2 hours from in time. Reviewer can create a generic report by clicking download option. Generic reports can be saved and edited by the reviewer and these reports are reusable. WMS is being migrated to workers dynamically according to their designation with access restriction protected and acts on daily basis.

MINING CUSTOMER REVIEWS TO ENHANCE OPINION

- With IMDB review dataset, used bayesian classifier to separate positive, negative and neutral reviews to enhance the most rated review.
-

Accomplishments

- With only six months of working in a solution, being asked to work for Onsite clients when I was handling Middle East region based on Support Service Owner's appreciation.
 - Received **Gem Award** for quick action and implementation of the solution.
 - Received a **BBK's Star Award** from a Client himself conveying that the solution level knowledge is really appreciable.
-

Certification

Business Intelligent Analyst Course from Udemy
