Description:	It's a Sales cloud based project which majorly focuses on to generate lead , managing clients , Products and its inventory to fulfill the need of client and support Business Process.
Title:	SEC on to GTRS (99.3 % Ack Rate)
Organization:	Capgemini India Pvt. Ltd
Domain:	Investment Banking (Regulatory Reporting-Trade and Transaction Reporting)
Duration:	Mar 2021 to Jan 2022
Description:	SEC on to GTRS is the project for the transition of SEC reports from legacy platform to GTRS. Currently we are working on planning for the project. We are reconciling reports of CFTC & CSA, understanding their logic and starting our work from acquisition, Obligation-Eligibility, Generation and Submission layer. Currently we are building mandate specific TRI to use them in further layer without impacting any other layer.
Title:	CFTC Replatforming & DTCC Re-Architecture (GTRS) (99% Ack Rate)
Duration:	May 2019 to MAR 2021
Description:	This Regulatory project focuses on the monitoring and analyzing reporting obligations of Business transactions across various asset classes (Credit, Rates, FX, Equities & Commodities) through an in house Reporting application. We centrally gather and maintain all records of OTC derivatives which we will go under various rules to determine their eligibility criteria for reporting. It is an automated system to validate the trade booked via the front office which follows the norms and amendments of various regulators like CFTC, CSA and SEC.
