PROJECT SUMMARY

Project 1:

Title : Property Management

Role : Salesforce Developer

Technologies : Force.com IDE, Apex Data Loader, Aura Component, Apex, HTML and JavaScript.

Team Size : 4

Project Overview:

With Property Compensation System, there is no need to invest time and money in complicated in-house software that you must purchase and maintain. Instead, you simply log in from any web browser, anytime, anywhere, from any Desktop or mobile device. It provides custom commission plans, users can automatically calculate splits, simplifying the real estate commission management process.

Roles and Responsibilities:

- Contributed to the development of Salesforce solution - Cloud Console Application for tracking and resolving customer inquiries, meeting project scope and client expectations.
- Involved in the requirement gathering and creation of High- and Low-level Design document
- Involved in the setup of the application, standard objects and process

- Creation of workflows to automate the process
- Created triggers to calculate the commissions based on different scenarios
- Created a Commission Approval process based on the Agent and Sales Manager
- Creation of Batch apex to process Bulk of data
- Import of Properties, Agents, Sales Managers data through Data Loader

Project 2:

Title : Health Care Patient Portal

Role : Salesforce Developer

Technologies : Force.com IDE, Apex Data Loader, Aura Component, Apex, HTML and JavaScript

Team Size : 4

Project Overview:

Healthcare Patient Portal provides a platform to automate the all the healthcare activities. It provides health data exchange capabilities. Clinicians get a single, fully integrated view of patients within their own native EHR and workflow. That gives them immediate access to actionable information for better decision making – and superior care coordination.

Roles and Responsibilities:

- Customize and personalize Salesforce.com based on requirements.
- Creating Objects and Validation Rules inside Salesforce.com and Mapping them to the existing functionalities and Objects.
- Worked on various salesforce.com standard objects like Accounts, Contacts and Opportunities.
- Maintain and developed the Custom objects, Custom fields, Custom tabs, and Validation rules.
- Customized different page layouts and assigned them for different profile users.
- Creating Workflow Rules, Tasks, Email Alerts, and Components to the needs of the application.
- Worked on workflows for field updates based on time dependent workflow.
- Involved in creating action components based on client requirements.
