- ❖ Participate in design meetings and contribute to technical approach.
- ❖ Performed detailed analysis of business and technical requirements and designed the solution by customizing various standard objects of Salesforce.com (SFDC) and using other Platform based technologies like **Visual Force, Force.com API**.
- ❖ Designed and deployed the **Custom objects, Validation rules, Page layouts, Custom tabs, Components, Visual force Pages** to suit to the needs of the application.

Project #1:

Client :Motorola Solutions Inc.
 Environment :Salesforce.com,Apex,Visualforce,Data Loader,Eclips IDE Plugins.
 Role :Salesforce Associate Developer&Admin.
 Duration :Dec 2017 to Mar 2019

Description:

Electronic communications pioneer Motorola, Inc. is a leading designer and manufacturer of cellular phones, cordless phones, two-way radios, pagers, cable modems, broadband set-top boxes, and other communications products and systems. This Project was based on migrating all the data from one instance to another instance. The goal of migration is to analyze and access the level of effort required to migrate users and data onto a unified salesforce.com platform. It mainly focused on building a framework for global and regional programs, providing a centralized foundation for acceleration of productivity enhancements and also to drive operational efficiencies.

Responsibilities:

- ❖ Developed **APEX triggers, classes, Visual Force pages**.
- ❖ Created and Customized the **Dashboards** and **Reports** with Salesforce CRM.
- ❖ Performed data migration into salesforce application using apex data loader through CSVfiles.
- ❖ Used **SOQL** and **SOSL** statements within Governor Limits for **Data Manipulation** needs of the application using platform database objects.
- ❖ Performed detailed analysis of business and technical requirements and designed the solution by customizing various standard objects of Salesforce.com (SFDC).
- ❖ Implemented security and sharing rules at **object, field, and record level** for different users at different levels of organization. Also created various profiles and configured the permissions based on the organizational hierarchy.
- ❖ Created **Workflows** and **Approval processes** and developed validation rules.
- ❖ Imported accounts and contacts data through **Import Wizard**.
- ❖ Used Sandbox migrated the code and deploying inbound and outbound change sets instance after testing.
