Curriculum Vitae

Professional Experience

Project #1

Project Title: TAM(Touchless Access Managment)
Client   : AlsecureTech

Responsibilities:
Developed website that consist of 2 types users. One is admin(ground staff) and the other is host. Hosts can invite visitors using the interface, which sends an email to visitors. Visitors can then register their meeting with host. Host can either accept or reject the meeting. Admin has access to full control of website. When a visitor enters the office he will be scanned with an IOT device which triggers a notification to admin. Admins can then validate COVID questionnaire to ensure the visitor is healthy and allowed to enter into office.

- **Technologies and its Usages:**

Component	Technology	Usage
FrontEnd	ReactJS	All meeting pages and notification of IOT product
Backend	Nodejs	All logic and functionalties of user and IOT are done using various libraries.
DB	MySQL	The user data and relation between them is stored

Project #2

Project Title: Tralamo
Client   : Internal Project
Team Size   : 5

Responsibilities:
- Implemented internal website to facilitate travelling needs where an employee can book tickets for any business related travel, participated in developing frontend and backend.

Curriculum Vitae

Technologies and its Usages:

Component	Technology	Usage
FrontEnd	ReactJS	Developed interface for user authentication, travel booking using Material UI
Backend	Nodejs,ExpressJs	Implemented the backend logic using NodeJS and ExpressJS
DB	MongoDB	Managed table structures, defined relationships etc
Payment Gateway	Paypal and Stripe	Integrated Paypal and Stripe to accomodate payment transactions using Visa and Mastercard

Project #3

Project Title: T-shirt Store(E-commerce)
Client   : Internal Project
Github :- https://github.com/lochan1996/T-shirt-Store-MERN-

Responsibilities:

● Users are of 2 types, one is admin and other is normal user, Admin can perform CRUD operation on products and normal user can only purchase products (identification is done through JSON web tokens)

Technologies and its Usages:

Component	Technology	Usage
FrontEnd	ReactJS	Developed interface for user authentication, developed admin panel to manage CRUD operations and interface for users to purchase T-shirts

Curriculum Vitae

Backend	Nodejs,ExpressJs	All logic and functionalties of user are done using various libraries
DB	MongoDB	The user data and relation between them is stored
Payment Gateway	Paypal and Stripe	User are allowed to pay using any of the payment gateway using there Master and Visa Card. Pay on Delivery option is also available

Project #4

Project Title: Covid-Tracker
Client   : Internal Projects
Github Link :- https://github.com/lochan1996/Covid-Tracker-React

Responsibilities:
To develop web page which consists statistics of infected , deaths and recovered patients from covid pandemic that has dark theme too.

- **Technologies and its Usages:**

Component	Technology	Usage
FrontEnd	Reactjs	Used MaterialUI and ChartJs. Fetched data using API

Project #5

Project Title: Bank of America
Client   : Bank of Americe
Team Size   : 12
Role   : ASE

Responsibilities:

Curriculum Vitae

- Performed Integration and Sytem testing for user requirement
- Perfomed Regression Testing for every sprint
- Agile methodology is followed
- Comparasion of reports generated from frontend with backend from UFT.

Work Aspirations

- To be a full stack developer.
- To work with diverse teams and reach excellence in the field.

Declaration: The above information is correct to the best of my knowledge.
