Work Experience

Senior Consultant, Deloitte Consulting US- India Pvt Ltd.
August 2014 – Present (6+ Years)

Project Learnings and Accomplishments

- Presently, Solution Designer and Team Lead for a **Field Service Lightning** Implementation for an Energy Industry client. Designed a custom Map solution involving Salesforce Data integrated with ArcGIS Map Layers. (Duration : 6 months)

- Designed and Developed a Health Care Product (**Managed Package**) with the ability for Patient Acquisition and Management, Insurance management, Provider data management. Responsible for building an outstanding Scheduling Appointment **custom flow** along with a **custom flow engine** using **LWC**, all well-integrated with EMR systems. Self-taught Lightning Web Components and developed intricate LWCs throughout the product. Conducting Peer Reviews, Mentoring and Training a team of 12 developers. Gained Insights on AppExchange app development & packaging and successfully passed the Salesforce Security Review of our Product which got **showcased in Dreamforce 2019**. (Duration : 1 Year)

- Designed, Developed and Delivered multiple diverse applications on Packaging & Manufacturing, Invoice Order Management, Drug Safety Reporting Scheduling for an LSHC client and carried out the **Lightning Transition of 11 Classic applications**. Self-taught Lightning Aura Framework and groomed and mentored a team of 10 people. (Duration : 1 Year 6 months)

- **Ideated and Built a Lightning Utility Tool** (Unmanaged Package) for allowing System Administrators in QA, UAT orgs to **Login-As other Test Users** to perform testing. This helped in managing all test users via configuration from a single dashboard – assignment of Permission Sets, Public Groups, Queues and grouped by Application. This tool was **rewarded First Prize** in Deloitte's Lightnathon Event based on its widespread usability as a Nugget and it is being leveraged by multiple projects.

- Built an application for a Life Science client to gather complete information on their suppliers/partners/vendors. Implemented a **meeting console** to easily manage agenda topics, notes and follow up tasks from meetings, built a custom interface (visualforce page) to **load data from CSV files** into the application from External vendors and implemented the ability to email out requests for qualitative feedback and view those responses in the application. (Duration : 6 months)

- Started my Salesforce journey by developing a knowledge-base application for the R&D team of a leading Life Sciences and Healthcare company to collaborate on Research Studies, track and redirect requests and manage their financials along with custom built reporting. Built **enhanced Clipboard page** for at-a-glance status of various studies, requests & financials and an Executive Dashboard for the client leadership. Learnt and implemented **a lot of Visualforce with custom stylesheets** backed up with an elaborate schema design. **Handled 9 releases** of enhancements along with Hypercare phases. (Duration : 2 Years 6 months)

- **Super passionate for Training and Mentoring** opportunities – college freshers, cross-training, upskilling and evangelizing people to drive Lightning adoption. Have been conducting monthly Lightning Trainings for Deloitte employees for more than two years now.

Skills and Competences
