Project	MSC Software R12 Support and Roll-out
Client	MSC Software
Modules	Project Costing, Project Billing, AP, AR, GL, FA
Designation	Associate Lead Business Analyst
Duration	Oct-18 to Dec-2020

Description:

MSC Software Corporation was formed in 1963 under the name MacNeal-Schwendler Corporation (MSC), by Dr Richard H. MacNeal and Robert Schwendler. The company developed its first structural analysis software called SADSAM (Structural Analysis by Digital Simulation of Analog Methods) at that time and was deeply involved in the early efforts of the aerospace industry to improve early finite element analysis technology. A key milestone was responding to a 1965 request for proposal (RFP) from the National Aeronautics and Space Administration (NASA) for a general-purpose structural analysis program that would eventually become Nastran (NASA Structural Analysis). The company subsequently pioneered many of the technologies that are now relied upon by industry to analyze and predict stress and strain, vibration and dynamics, acoustics, and thermal analysis. In 1971, the company released a commercial version of Nastran, named MSC/Nastran. The company is headquartered in Newport Beach, California and employs approximately 1,300 people in 23 countries. 2016 revenue was US\$230 million. In February 2017, the company was acquired by Swedish engineering services conglomerate Hexagon.

Role and Responsibilities:

- ✓ Participated in Requirement gathering meeting for roll-out.
- ✓ Prepared the RD-50 document based on MOM.
- ✓ Configured the system according to Business Requirement.
- ✓ Did intercompany billing setups, And Intercompany billing issues,
- ✓ Involved in the customization of Billing and Revenue extensions.
- ✓ Worked along with Technical Team to develop the Custom Components.
- ✓ Prepared Test Cases and User Manuals for the UAT.
- ✓ Conducted UAT with End Users and resolved the Issues during the UAT.
- ✓ Raised Service Requests with Rimini Street to resolve the bugs and other product related issues.
