Bachelor of Engineering RGPV, Bhopal	2011
HSC Columbia Convent, Indore	2007
Matriculation Columbia Convent, Indore	2005

About

Around 9 years of IT experience in Data Warehousing, Data Management and Integration projects, working alongside Data Architects, Modelers and Designers.
2+ years of Project Management, Scrum Master, handling resource allocation, management and Project timelines.
Designed full life cycle of DWH projects from Requirements Gathering, Design, Implementation to Testing and Release, using Waterfall and Agile methodology.
Architect level expertise in ETL DataStage.
Currently working for JPMC, Commercial card Data Management.

Experience

Project Manager | Scrum Master Nov 18-Present
JPMC, Commercial Card Data Management

Global Credit Card Data Warehousing team sourcing data from various source systems including TSYS, Third Parties like LYNX etc and loading in OLTP (Oracle) and Historic storage (Tera Data).

Responsibilities

Collaborate with Cross Functional teams, Product Stakeholders and Vendor teams to review and consolidate new scope items.
Managing Scrum board, planning the sprint backlogs using JIRA, conducting sprint review and daily stand-up meetings to ensure on track delivery.
Organizing and managing the workload of the team keeping them motivated for quality results.
Setting up retrospective meeting to discuss the outcomes and lessons learnt during the sprint, using the burndown techniques to evaluate the gaps after each release and help deliver committed work.
Working with Product Owner to define project scope and objectives.
Quarterly assessing the Scrum Maturity of the team.

ETL Specialist Aug 16-Nov 18
JPMC, Commercial Card Data Management

Responsibilities

Extensive use of Data Stage, Teradata, Oracle, Unix & Ab Initio for daily work.
Worked to deliver all the required details like source system, timestamp details, record count, rejected records details through Unix script to Data Quality team to perform data validation.
Part of dev team to successfully dry run the Chat Bot which can be used to assist users in banking credit card departmental queries.

Technical Associate: Team Lead

Jan 16 – Jul 16

Infosys -AETNA

The project deals with the data management of insurance claims in different aspects. It validates and registers the claims and then processes accordingly.

Responsibilities

Participated in discussions for Technical and Business Requirements. Designed the ETL processes using DataStage to load data from flat files, DB2.

Used various stages namely Sequential, Dataset, Copy stage, Remove duplicate and so on in accomplishing the ETL component.

Technical Associate: Team Member

Jul 15 – Dec 15

Infosys - AMP Services

The project deals with the management of data of the new and old customers, maintaining changes into their data using ETL and eventually storing into the MDM.

Responsibilities

Generating the XML of the data and then loading it to the MDM

Also, extracting the data, making the changes into the extracted data and again loading to the MDM.

Developed various data stage jobs using standardize, XML input, XML output, row generator, column generator, change capture, surrogate key generator, waves etc.

Technical Associate: Team Member

Dec 14 – Jun 15

Infosys -New York Life Insurance

The project is to generate a consolidated report of all DataStage jobs (Parallel/Server/Sequence) which will help in impact analysis, up to date documentation in various environments.

Responsibilities

Involved in designing various Datastage parallel, server, sequence jobs for the extraction of various job level and stage specific details from the Datastage job DSX files.

Used UNIX for automated dsx file generation of a project tool, dscmdexport commands. Developed Perl script for dynamic DSX file generation for multiple jobs from exported project DSX file.

ETL Developer

Oct 12– Nov 14

Tech Mahindra -Chevron

Part of Chevron Corporation's Downstream Business Unit to create a warehouse for the downstream production data and to generate reports for business users. Designing complex ETL pipelines in data Stages V8.7
