Contact No: 9806102876/8884826849

Objective:

To obtain the role of Software Engineer where my skills will grow on various levels and it will contribute to the organization's growth.

Work Experience:

Name of the Company	Designation	From	To	Duration (Years)
Larsen & Toubro InfoTech	Software Developer	Oct, 2017	July,2020	2years,9months
LMS Solutions pvt ltd. (Bhopal)	Intern	Aug, 2016	Dec, 2016	4 Months

Summary:

I worked as a **Software Engineer in Larsen & Toubro Infotech Pvt Ltd. with 2years and 9months of experience** in software development under agile methodologies. Comprehensive knowledge of **SDLC**.

I had worked for an insurance client as a developer. I had worked on different business insurance projects. Exposed to complete **SDLC.** I had worked on frontend and database technologies Including different scenarios on UI, database and stored procedure changes as per feature requirements and testing thereby ensuring that application meets the business requirements. Able to communicate effectively with multifunctional teams and technical stuffs. Ability to work well in both team and individual environments. Capability to adapt to new tools and applications. In agile platform always got a chance to communicate with clients on a day to day basis which helped a lot to understand the requirements and analysis of data based on inputs.

Technical Skills:

Utilities & Tool: Web Storm, Visual studio code, Fiddler, Microsoft SQL Server, SVN, Github, Autosys Jobs, Fiddler, Rally, Postman, Jenkins
Technology: SQL, CSS, HTML5, Angular 5, Tableau(Learning)
Operating Systems: Windows 7/XP/2000/8/8.1/10
Domain: Business Insurance - US based client (Travelers)

Project Experience:

As a Software Developer, successfully completed the following assignments:

CRMR (Cumulative Rate Maintenance Ratio) Project:
Business Insurance project which is based on yearly rates for policies. (Oct 2017 to Jan 2019)

Major work on Bi-rate maintenance website to handle all customer policy.

Involved in the whole SDLC process like Define, Design, Build, test and implementation since the project was on agile all types of tasks were given to team members in different iterations.

Taking care of addition of new policy for states specific data into database and UI side.

Having good experience of analysis of policy data.

Worked on UI enhancement and fetched optimized data from the database.

Book Transfer Project:
Business and Personal Insurance project based on all types of insurance for customers. (Feb 2019 to July 2020)

Built from scratch major addition in UI part addition of different types of insurance policy under customer account.

Involve in the whole SDLC process like Define, Design, Build, Test and implementation.

Taken care of all process related activity of the project.

Changes in stored procedure to fetch the data from different databases for each specific customer and with the total number of policies acquired by the customer.

Policy amount related automated calculations after fetching data from database and again storing the output in different tables in database as updates as per feature requirement from client.

UI updates from different types of dialogue box and that information stored under the required table in the database.
