Meals Web App
June 2020 - July 2020

https://mealsassignment.herokuapp.com/

Developed Meals Web App using MongoDb, Express, React and Node in which user can keep the track of his daily meals. Users can add meals along with it's calories and can select the date on which they want to consume that meal. It helps the users to keep their diet healthy and maintain their calorie levels on the daily basis. Users can also edit and delete their already added meals. It has a good UI to view all the added meals. All the meals are grouped by their date of consuming so that they are easily distinguishable, accessible and searchable.

Photo Gallery
March 2020 - April 2020

https://typitophotoapp.herokuapp.com/

Developed photo gallery web app using Node, Express, React and Redux. Developed 2 API's for image uploading and to view all the uploaded images in a grid. Used Multer for uploading the images on the server. Made different renditions of uploaded images by using image processing. Used React-Redux to show full image preview by sharing data between components.

VS Code Extension for Auto Submitting Scripts
