Seasoned Python Automation Engineer with nearly 8 years of hands-on experience in developing and implementing automation solutions. Proven expertise in end-to-end automation processes, with a focus on forming automation pipelines using web APIs, database connectors, UI automations and data processing. Proficient in utilizing Python, its variety of libraries and related frameworks to create efficient and scalable automations. Adept at working across diverse industries, with a strong track record of optimizing business processes through technological integration. Skilled in multiple programming languages and cross-platform technologies. Seeking a challenging role to apply my extensive experience and contribute to the success of innovative projects.

	✓ Rundeck	✓ HP UFT	✓ Work Flow Manager	
➤ Additional Skills	✓ Django	✓ PHP	✓ ReactJS	✓ NodeJS
	✓ MySQL	✓ SQL Server	✓ MongoDB	✓ Snowflake
	✓ VB Script	✓ RPA Blue Prism	✓ Shell Scripting	✓ GoJS
	✓ HTML	✓ CSS	✓ Bootstrap	✓ Jenkins

Professional Experience

2021-09 to Present **Data Engineering Senior Analyst**

Accenture Solutions Pvt. Ltd., Pune, Maharashtra.

- Collaborated with cross-functional teams to identify process requirements and deliver end to end automation solutions.
- Leveraged Python to create ETL scripts for data extraction from logs, mails and web.
- Used Python's variety of modules for APIs utilization, database operations, ssh connectivity, mail monitoring, mail sending, data analysis and web scrapping etc.
- Developed RESTful APIs using FastAPI and deployed as a linux systemctl service.
- Implemented front-end automations using Selenium, HP UFT and RPA BluePrism tool.
- Utilized Rundeck, WorkFlow Manager and few internal automation platforms to deploy the automations and form automation pipelines.
- Employed GitLab for version control and collaborative development.
- Led a team of developers in designing, developing, and deploying solutions by acting as a mentor, fostering a collaborative and knowledge-sharing environment.

2019-01 to 2021-09 **Software Developer**

Tata Communications Transformation Services Ltd., Pune, Maharashtra.

- Designed and implemented innovative solutions for internal and field operations, enabling seamless provisioning, real-time monitoring, tracking, reporting, and comprehensive analysis. Delivered cutting-edge capabilities that optimized operational efficiency and provided actionable insights using Python, Django, MySQL, Linux and CCNA skills.
- Utilized Pandas, Selenium & SQL to perform data ETL and reporting.
- Created dashboards, visualization tools using a variety of web technologies including Django, php, HTML, CSS, Bootstrap and java script libraries like JQuery & GoJS.
