Career Contour

Pramati Technologies , Hyderabad

Designation	:	Principal Engineer QA
Periods	:	July 2016 - Till date

ZenQ, Hyderabad

Designation	:	Team Lead
Periods	:	January 2012 – July 2016

Projects Handled in My Career

Project 1:

Client	:	HyperionX (Empower)
Role	:	Principal Engineer, QA
Testing Methodologies	:	Manual and Automation Testing using Cypress

Empower serves as central platform for Advisers, Insurers and Employers to simplify and improve the way that Group Protection insurance policies are administered and managed. It is the interface between employers and insurance providers.

Responsibilities:

- Involved in analyzing requirements during the Grooming meetings.
- Writing end-to-end Test scenarios by understating the functionality of the Application.
- Creating Test plan.
- Writing Automation scripts for major workflows.
- Involved in Script Reviews.
- Documenting and reporting bugs which are occurred while executing automated scripts.

Project 2:

Client	:	Nielsen
Role	:	Senior Engineer, QA
Testing Methodologies	:	Manual and Automation Testing using Geb and TestNG

Nielsen is a global performance management company that provides a comprehensive understanding of what consumers Watch and Buy. Nielsen's Watch segment provides media and advertising clients with Total Audience measurement services across all devices where content video, audio and text is consumed. The Buy segment offers consumer packaged goods manufacturers and retailers the industry's only global view of retail performance measurement. By integrating information from its Watch and Buy segments and other data sources, Nielsen provides its clients with both world-class measurement as well as analytics that help improve performance.

Responsibilities:

- Involved in analyzing requirements during the Grooming meetings.
- Writing end-to-end Test scenarios by understating the functionality of the Application.
- Creating Test plan.
- Writing Automation scripts for major workflows.
- Involved in Script Reviews.
- Documenting and reporting bugs which are occurred while executing automated scripts.
- Create quality reports of every sprint.

Project 3:

Client	:	eVestment
Product Name	:	Omni2.0
Platform	:	Java
Role	:	Team Lead
Testing Methodologies	:	Manual and Automation Testing using Selenium Webdriver

eVestment provides a flexible suite of easy-to-use, cloud-based solutions to help global investors and their consultants select investment managers, enable asset managers to successfully market their funds worldwide and assist clients to identify and capitalize on global investment trends.

Responsibilities:

- Get involved in analyzing requirements during the requirements.
- Writing end-to-end Test scenarios by understating the functionality of the Application
- Creating Test plan.
- Involved in Design and Development of Selenium Page Driver
- Evolving automation scripts.
- Involved in Script Reviews.
- Documenting and reporting bugs which are occurred while executing automated scripts.
- Collection of Test metrics and reporting.
