WORK EXPERIENCE

Senior Software Developer
Tieto India Pvt Ltd. (Formally known as Tietoevry)

09/2023 - Present

Responsibilities

- Skilled in developing high-performance user interfaces with React.js, ensuring smooth and responsive web applications.
- Expertise in optimizing React.js applications to increase performance by up to 12%, ensuring faster load times and smoother user interactions.
- Experience in implementing efficient state management techniques like Redux or Context API to enhance application performance and scalability.

System Implementer (React Developer)
Amdocs

02/2022 - Present

Responsibilities

- Responsible UI for implement new features which is in the last 2 quarter increase the traffic by 43% of two different websites.
- Accessing the UI design and making sure they are technically feasible.
- By using Adobe Experience Manager(Low Code Platform) which increase the efficiency of Development team by 38% in the last 3 months.

Associate Delivery(MERN Stack Developer)
Smartdata Enterprises

02/2021 - 01/2022

Responsibilities

- Spearheaded transition from Electron to MERN stack reduce the latency by 40% and increase the database active effectiveness by 20%.
- Analysed business requirement to translate functional requirements into technical requirements and developed web applications using MongoDB,Express JS.
- Maximized application efficiency, data quality, scope, operability, and flexibility.
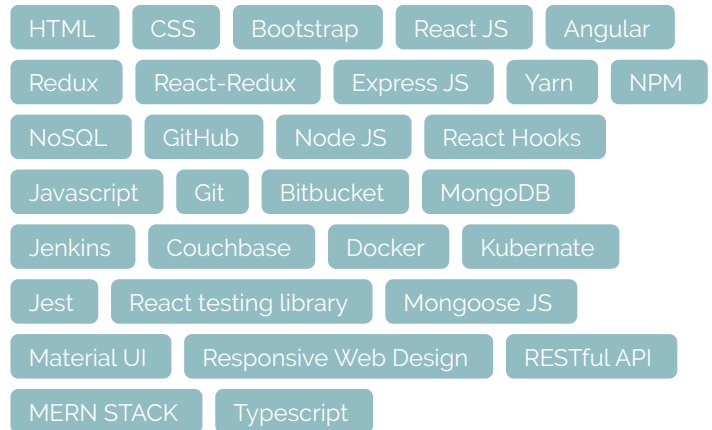

EDUCATION

Bachlore of Engineering in Computer Technology
Priyadarshini College of Engineering,Nagpur

2014 - 2017   *C.G.P.A 6.54 / 57.90%*

SKILLS

HTML   CSS   Bootstrap   React JS   Angular   Redux   React-Redux   Express JS   Yarn   NPM   NoSQL   GitHub   Node JS   React Hooks   Javascript   Git   Bitbucket   MongoDB   Jenkins   Couchbase   Docker   Kubernate   Jest   React testing library   Mongoose JS   Material UI   Responsive Web Design   RESTful API   MERN STACK   Typescript

PROJECTS

Public 360
- Developed dynamic web application using React.js, ensuring responsive UI and optimal user experience.
- Troubleshoot interface software and debugged application code to improve functionality and performance by 50%.

Globe
- Developing, design and implementation of the new API endpoints as a part of high-volume single page application, that provided end to end critical connectivity channel for distributed functionality and increase system cohesion keeping manageable code complexity.
- Improving product aesthetic and UI of the business-critical progressive web application, resulting in 73% CHI (Customers Happiness Index) increase.

Healthiex
- Analysed business requirement to translate functional requirement into technical requirement and developed web applications using MongoDB, ExpressJS,ReactJs,Redux and NodeJS (MERN STACK).
- Contributed to the continual improvement of the design and development process, maintaining strong aspects while researching and providing recommendations for areas of improvement.

Panchayat Guru
- React-Electron Boilerplate automatic synchronization code in client and server side whenever connectivity is accomplished between client and server then upsert the data in cloud centralised server in real-time and stored data in encrypted form due to security.
- Developer the NodeJS Algorithm of generating encrypting the text file for transfer over the network if internet connectivity is not established.If the internet connection is established then upload the encrypted text file in RESTful API we combine the private key plus public key decrypt it and store data on MongoDB.
