PROJECTS

Salesforce Developer and Administrator

PodPoint Ltd

09/2019 - Ongoing Pune

Customer is a leading UK provider of charging infrastructure for electric vehicles, England. It provides charging units for home, business and public use. Pod Point operates the Open Charge network which aims to offer a charge point everywhere drivers park. The Open Charge network is accessible via the smartphone app.

- Implementing Salesforce - Field Service Lightning (FSL) configurations including the Objects, Profiles and Permissions, Licenses, Gantt chart
- Worked on setup and customize Service Cloud and Case object's tools like Email-to-Case, Assignment Rules, Auto-response rules and other logic as per business requirement
- Peculiarly worked with Lightning Flows (Screen flows, Auto-launched flows, and FSL flows) in combination of Process Builders to implement most of the business requirement instead of writing code
- Designed lighting pages and created basic custom lighting components for Stock Checks for Inventory department.
- Pointedly written bulkified triggers using Light weight Trigger Framework
- Responsible for writing custom Apex classes, Visual force pages along with custom branding using html, CSS, JavaScript validation
- Implementing Process builder, validation rules, Approval processes, workflow rules
- Implemented Sales cloud with customization for Lead, Opportunity objects.
- Done manual deployment using SalesforceDX and git.
- Configured Reports and Dashboards for Commercial Teams and revenue
