

Summary

Over 5 years of professional experience in working with Microsoft technologies like C#, ASP.NET, ASP.NET WEB .Net Core, ADO.NET / Entity Framework, Microsoft SQL Server, PostgreSQL, IIS,

Expert in implementing the applications using 3 - Tier architecture.

Experience in designing and branding Master Pages utilizing Server Controls User Controls Data Grid Control Form Validation Controls Custom controls and CSS

Expertise in developing Console, Windows and Web Applications using C#, ASP.NET, ADO.NET, LINQ, XML, JSON, JAVASCRIPT, AJAX and JQuery in Visual Studio.

Extensive experience with ADO.NET, Code First Approach and Database-First Approach using Entity Framework and LINQ for data connection

Experience in creating Tables, Stored Procedures, Prepared Statements, Functions, Views and Joins using SQL Server 2008/2012/2014/2016.

Experience in working with Agile remote teams using tools such as Slack, Teams, Jira, and Git

Ability in learning technologies and adopting new development environments.

Experience

software engineer

Thomsun infocare • KOCHI, Kerala

06/2021 - Present

THOMSUN INFOCARE, KERALA, INDIA

Software Engineer

Gathering information from Business Analyst then Analysis and Design the requirement.

Followed Agile methodology with 10 days sprint involved in daily Stand-up Meetings, Status Meetings, Backlog Meetings and Code Review Meetings.

Maintain the SOLID Principles

Creating Framework for Special and Moderating controllers

Deployed Frameworks for database with MS SQL Server, used Database First Approach to build the models and back-end logic

Perform code reviews and collaborate with peer designers / developers on project work

Resolve escalated technical issues

Software Engineer I

Afi Infotech • KOCHI, Kerala

08/2018 - 06/2021

Involved in all the phases of Software Development Life Cycle (SDLC) including Requirements gathering, Designing, Programming, Testing and Documentation of various projects

Participated in requirements gathering, analysis and design of the client requirements

Constructed program development logic flow with consideration to function and the ability to be updated in the future

Managed client relationships to ensure programs are developed within the client's specific parameters/requirements

User Management and Report handling

Involved in writing database scripts, stored procedures, views, and functions

Designed and developed front-end user interface using windows forms and some third-party tools

Worked on enhancements of the product, extensively generated reports using SSRS, RDLC and crystal Report

Implemented technical use cases by designing and developing the appropriate windows forms using VB.Net code

Programmer Analyst

systalent pvt ltd • KOCHI, Kerala

10/2016 - 07/2018

Followed Agile methodology with 3-week sprint involved in daily Stand-up Meetings, Status Meetings, Backlog Meetings and Code Review Meetings.

Participated in requirements gathering, analysis and design of the client requirements

Created Widgets, Template-Driven Forms and Data-Binding to display the related items

Constructed program development logic flow with consideration to function and the ability to be updated in the future

Managed client relationships to ensure programs are developed within the clients' specific parameters/requirements

Deployed 3-layer structure for the project such as Data-Access-Layer, Data-Business-Layer, and UI-Layer

Deployed Frameworks for database with MS SQL Server, used Database First Approach to build the models and back-end logic

Configured Postman to test the Web API functions

Used SVN for source control and JIRA for project management

Performed user acceptance testing on applications using manual testing methods, resolve problems, identify trends, determine system improvements, implement change

jr software engineer

Noctech pvt ltd • KOCHI, Kerala

05/2015 - 11/2016

Involved in all the phases of Software Development Life Cycle (SDLC) including Requirements gathering, Designing, Programming, Testing and Documentation of various projects

Participated in requirements gathering, analysis and design of the client requirements

Constructed program development logic flow with consideration to function and the ability to be updated in the future

Managed client relationships to ensure programs are developed within the client's specific parameters/requirements

User Management and Report handling

Involved in writing database scripts, stored procedures, views, and functions

Designed and developed front-end user interface using windows forms and some third-party tools

Worked on enhancements of the product, extensively generated reports using SSRS, RDLC and crystal Report

Implemented technical use cases by designing and developing the appropriate windows forms
