**PROFESSIONAL EXPERIENCE**

**Product Manager – Digital Communications**

**2019 – Present**  
**Blue Shield of California**

- Drive product vision, development, and launch for Blue Shield's transition from printed mail to digital channels through Smart Communications
- Gather requirements from internal customers and convert them to technical tasks for the engineering, UX/UI, and configuration teams
- Groom and prioritize the Product backlog for 2 Agile teams
- Develop the Kibana Dashboard to track and report KPIs across the company - to track milestones and accomplishments; to manage key risks and issues; and to improve team collaboration
- Manage UAT testing before and after every product release
- Successfully helped roll out the new Blue Shield message center inbox for subscribers to receive digital communications through web and mobile apps
- Cut \$3.6M in yearly administrative cost through digitizing Claim related communications

**Senior QA Engineer**

**August 2014 – 2019**  
**Blue Shield of California**

- Project lead for the Member Rebuild Project. Managed and trained a team of QA Engineers
- Managed a team of offshore QA engineers for the Find a Doctor application for web and mobile apps
- Set up Selenium testing infrastructure for Java applications
- Wrote automation scripts for Android and iOS using Appium
- Wrote automation scripts for responsive website testing using Selenium
- Worked with developers and product managers to resolve issues found during testing
- Tested API services using Soap UI
- Implemented Orthogonal Array Testing methodology within the QA team to reduce the number of test cases by 70% while substantially increasing range of coverage

**Senior Software QA Engineer**

**Feb 2013 – May 2014**  
**Financial Engines**

- Provided back-end infrastructure and database testing for incoming 401k data
