- Certified by Microsoft in **Azure Developer**.
- Certified Scrum Master.
- Trained team of 20 on Technical Skills in Mahindra Satyam.
- Knowledge sharing to the team members on various topics like: Spring MVC and web services.
- Attended GHCI -2018 -represented CA Technologies
- Attended vGHCI-2021 through JDA software

**Achievements:**

- Received Crystal Ball Innovation Award 2021 @ Blue yonder
- Received Efficient Associate Award for 2009 @ Mahindra Satyam
- Received POB in 2009 @ Mahindra Satyam

**Project Experience**

**Project - 1** : JDA – **Strategic Pricing and Markdown**

**Role** : Technical Architect

**OS** : Windows Platforms

**Tech Skills** : Java 8, spring boot, DHTML, WebLogic, Oracle, IBM CPLEX

**Environment** : Windows

**Duration** : September 2019 – Till Date

**Description:**

JDA Strategic Pricing is used to determine the retail price for a product at a store. If your business requires prices by store cluster, whether chain or zone, then zone level pricing can be employed in Strategic Pricing. Zone level pricing results in a price recommendation for a product across different stores in a cluster.

**Responsibilities:** Possesses deep knowledge of most of the components within the product and the technologies used in those components. Key contributor to the design of new features and is a hands-on developer. Influences other developers across scrum teams and mostly make tactical decisions about product direction.

- Trusted advisor for architectural and technical concerns for most critical and complex modules.
- Collaborates with the team and other leads to identify and resolve technical challenges related to the delivery.
- Ensures the usage of reusable components through design, and ensures that code quality, performance, and scalability and reliability requirements are met
- Keeps aware of new technologies and analyzes how they can be applied to products and the current delivery project
- Ensures the solution built satisfies business and technical requirements, the non-functional requirements defined, such as security requirements and performance objectives, are met
- Manages technical issues, coding, and configuration to ensure delivery of modules and the product
- Collaborates across teams around technical and architectural issues
- Reviews requirements, business use-cases and scenarios, and contributes to product documentation.
- Responds to queries from internal and external sources (within a project team, or across project and services teams)
- Participates in interviewing of developers
- Introduced *Test-driven development* process for new features implementation.
- Complete ownership on SCPO modernization design and implementation in the product.
