Career Objective:

Seeking a position to utilize and expand my skill, which offer professional growth while being passionate and innovative. Flexible and likes to challenge new roles, with additional responsibilities.

Professional Experience summary:

- Currently working as a software developer in **Value Momentum** with experience of **1 year 10 months** in **OpenText Exstream**.
- Also worked as software developer in **HCL Technologies Ltd** for **2.3 years**.
- Successfully worked with client such as **GEICO** (Government Employees Insurance Company), **CBA** (Common Bank Wealth of Australia) and had in depth expertise in all aspects of the SDLC including requirement analysis, design, development and debugging.
- My responsibilities Included:
 1. Understanding the existing system and gaining business knowledge.
 2. Requirement gathering, analysis and functional design creation
 3. Designing and coding based on functional specifications in Open Text Exstream.
 4. Adding rules and creating formulas as per the requirement.
 5. Preparing design documents, test results and performing unit testing.
 6. Participating in quality control and production deployment activities.

Technical skill set:

- Experience in working Agile methodology and Jira Tool.
- Work experience in different Data files creations, their File Formats (delimited, columnar and XML Files) and their Mapping.
- Accessing data with Reference and Initialization files.
- Aware of PDF pass through concept.
- Work experience in messages (Text and graphics), Rules, Variables, components, Design Templates, Data sections.
- Worked with tables based on sections.
- Work experience in output Queue's and report generation.
- Strong problem analysis and solving skills.
- Familiar with aspects of software development life cycle like requirement capturing, analysis, design, development, production support, maintenance and Testing.
- Excellent written and verbal communication skills.
- Ability to assume responsibility and work independently and as a pro-active team member.

Educational Qualification:

EXAMINATION	BOARD/ UNIVERSITY	YEAR
BTech	KL University	2015

Project Details:

Project: Staff counselling	
Role	Developer.
Environment	Open Text Exstream (version 16)

Project Description:

This project is to design new live forms using Open Text Exstream. XML Inputs will be provided and both MPW and PDF's will be generated using Exstream.

Responsibilities:

- ✓ To Design and develop new on demand applications in Open Text Exstream.
- ✓ To conduct peer reviews and perform unit testing.
- ✓ To perform release activities and support for production deployment.

Project: Elixir	
Role	Developer.
Environment	HP Exstream Dialogue, VB.

Project Description:

This project is to design new applications using HP Exstream. This project deals with OnDemand and Batch insurance policy for 2 separate line of businesses Life and Super Investment products. To accomplish this task involvement of 3 teams is measured. Team Mainframe supply Customer details to DAT Team and customer data are filter and provides input in Delimiter format to HP Exstream. Outputs are generated in both PDF (Color) and PDF (black and white) where I have created multiple output queues. Applications also consists of cover letters and transaction detail pages where I have worked in tables and data sections. It also consists of DASP forms which will be send dynamically using PDF pass through concept.

Responsibilities:

- ✓ To Design and develop new on demand applications in HP Exstream.
- ✓ To conduct peer reviews and perform unit testing.
- ✓ To perform release activities and support for production deployment.

Project: Infinity	
Role	Developer
Environment	HP Exstream Dialogue, VB.

Project Description:

This is a migration project which includes requirement specific text changes with date driven logics and introduction of new forms within the existing applications using PDF pass through concept. In order to achieve this initialization files and formula variables were added to the applications. New footers were designed in templates using section paragraphs and messages. Also used some inbuilt functions like array functions, Date functions and math functions to manipulate the data.

Responsibilities:

- ✓ Understanding the existing system and gaining business knowledge.
- ✓ To design and develop the coding for the module and perform Unit testing.
- ✓ To conduct peer reviews during design, coding and testing.
- ✓ To give weekly status update on the progress of the project to Project Lead.
- ✓ To perform release activities and support for production deployment.

Project: Enhancements	
Role	Developer and Tester
Environment	HP Exstream Dialogue, VB.

Project Description:

This project involves multiple enhancements (SWR's) to the existing applications like text changes, changes in report files and output queues, designing and adding templates or flow pages to the existing applications.

Responsibilities:

✓ Analysis, Design, Development, Testing, and implementation.

Project: SuperTrace	
Role	Developer and Tester
Environment	HP Exstream Dialogue, VB.

Project Description:

This project requires adviser data (consists of adviser numbers and codes) to be included in the application which won't be coming from customer driver file so for that I have created reference files and linked them to the customer driver files using key variables.

Responsibilities:

✓ Analysis, Design, Development, Testing, and implementation.

Project: Exit statements and Annual statements	
Role	Developer and Tester
Environment	HP Exstream Dialogue, VB.

Project Description:

This project requires splitting of customer communications in the templates between exit and annual statements so for that I have grouped the design objects using design layers and gave them in the respective outputs.
