Role	: Salesforce Admin/Developer

Description:

Module deals with empowering sales teams with real-time visibility into project status, resource availability, and project history, and gives consulting managers deep visibility into Project pipeline, so they can always have the right resources ready.

Roles and Responsibilities:

- Customizing existing functionality and create new ones that meet the client's requirements.
- Manage any support cases that are transferred from Support team on ground of technical issues.
- Mentor and guide new and existing team members in removing any blockers during the course of story development.
- Responsible for Sprint grooming and Sprint/Hotfix deployments following Agile methodology

Last worked at Kasm Technologies Pvt. Ltd. From May 2018 to July 2020.

PROJECT #1

Smart School:

Client	Kasm Technologies Pvt. Ltd.
Environment	: Salesforce.com, Apex, Lightning component, Data loader, Eclipse IDE
Team Size	: 6
Duration	: May 2018 – Jun 2019
Role	: Salesforce Admin/Developer

Description:

The School Management Application is designed to make the processes like student admission, fee payment, Parent and teacher interaction, student attendance tracking and many more. It also helps in employee and resource management. It has most of the facilities that a modern school requires to computerize its day-to-day jobs. It provides facilities to keep track of student fees, teaching and non-teaching staff with all their required details. This application is capable of doing online fee payment methods.

Roles and Responsibilities:

- Involved in Data model designing.
- Involved in Administration (Configuration changes), Development (Customization) and Development activities of Salesforce.com
- Developed several apex classes, Test classes and lightning components.
- **Designed and developed Weather and News components.**
- **Worked on REST service to fetch data from API.**
- Worked on Lightning experience.
- Involved in Unit Testing and Test coverage.
- Implemented and delivered projects under Agile Development Environment and Test Driven Environments with large and small Team Projects
- Developed component for News and Weather which will display the news related to specific branches for graduate and post graduate students. . If the student is from branch EEE or ECE then the API actually pulls articles related to the branch and displays the same. For students less than grade then Simple tips can be shown. Another component is weather info for teachers. It displays weather for the current day and forecast, for 7 days.
