Project Details (Appsource services pvt ltd)

Project #1:

Title : Mobile Banking

Duration : Jan 2020 to Jan 2022

Role : SQL

Developer

Team members: 6

Project Description: This module will provide an easy and simple method of updating information related to deposits and withdrawals in the bank records. It includes: Creating new accounts and account numbers with access codes. Through these access codes, customers will interact. These access numbers will be unique and confidential. This module will provide an easy method to users to manage the accounts. When they run the application they will be required to fill in the login name and password.

Here, the options offered to the User are:

- Balances: They will able to view the current status of their accounts.
- Statements: They will get a detailed reported of the transaction carried out during a specified period.
- Transfers: this will be related to the transfer of money from various accounts of the customer.
- Stop payment: this option will allow Users to fill in details regarding a payment or transfer of funds, they want to stop.

Project-2

Title: Health watch

Duration: Feb 2022 to till date

Role: SQL production and development

Client: TCS

Project Description: I worked in Health watch application project in this Project we are using SQL queries to build and resolve the Customer incidents and writing SQL complex Queries using SQL fundamentals, commands, Views, joins, triggers and store procedures to resolve the issues, Taking store calls for my project work directly from customer through skype to resolve Customer Queries on daily basis

- Served as the initial contact person for all SQL support queries.
- Collaborated with business support professionals to provide full system maintenance.
- Supported code activations and updated business tool applications per company requirements. Delivered database deployment through the whole system lifecycle.
